Ensuring Safe School Environments: Exploring Issues--Seeking Solutions presents research findings and information about school violence, with a focus on strategies for increasing school safety. Based on a special topical issue of Rural Special Education Quarterly, the original journal articles have been rewritten to address safe schools from the perspective of suburban and urban, as well as rural environments. Topics include the frequency of violence in these different settings; violence as it directly impacts school administrators; strategies for preventing and addressing violence at both the school and individual levels; and ways to work with the community both in and out of schools. Part I focuses on issues. In Part II, solutions that have been used to deal with youth violence are offered for readers to consider, including chapters on effective conflict management practices, behavioral support plans, school-community relations, the development of a caring school community as a way to decrease tendencies toward violence, and a model which demonstrates an in-practice, state-wide program designed to assist in the development of a community-focused school. Each chapter concludes with discussion questions and a case study to enhance understanding of and reflection on the issues surrounding school violence. The text is intended as supplementary material for any course preparing school

Here is a fresh, common-sense take on education reform, not by an educator or administrator or politico, but by a concerned mother and citizen who dares to proclaim that America is NOT offering a quality education to ALL its children. Young sees an effective public education system as a fundamental function of a strong republic. Yet opposing political agendas are directing federal, state, and local lawmakers toward failed programs, wasted dollars, and poor results for American public education. In *The Crucial Voice of the People, Past and Present*, Young presents important insights into what can be done to “fix” America’s public education system. Her research and observations are eye opening and provide all readers with a galvanizing focus on what needs to be done and how to get there. But most importantly, the book energizes parents with new ideas and tools to improve the schools in their own communities. *The Crucial Voice of the People, Past and Present* is a call to the public education system to openly listen and to communities to make themselves heard.
