The shape factor criterion is available only for triangular and tetrahedral elements. The shape factor ranges from 0 to 1, with 1 indicating the optimal element shape and 0 indicating a degenerate element. For triangular elements the normalized shape factor is defined as . Optimal element area is the ...

ABAQUS provides " Rayleigh " damping for this purpose. Rayleigh damping can also be used in direct-solution steady-state dynamic analyses and subspace-based steady-state dynamic analyses to get quantitatively accurate results, especially near natural frequencies. To define Rayleigh damping, you specify two Rayleigh damping factors: for mass proportional damping and for stiffness proportional ...
