There can be little doubt that opera and emotion are inextricably linked. From dramatic plots driven by energetic producers and directors to the conflicts and triumphs experienced by all associated with opera's staging to the reactions and critiques of audience members, emotion is omnipresent in opera. Yet few contemplate the impact that the customary cultural practices of specific times and places have upon opera's ability to move emotions. Taking Australia as a case study, this two-volume collection of extended essays demonstrates that emotional experiences, discourses, displays and expressions do not share universal significance but are at least partly produced, defined, and regulated by culture. Spanning approximately 170 years of opera production in Australia, the authors show how the emotions

associated with the specific cultural context of a nation steeped in egalitarian aspirations and marked by increasing levels of multiculturalism have adjusted to changing cultural and social contexts across time. Volume I adopts an historical, predominantly nineteenth-century perspective, while Volume II applies historical, musicological, and ethnological approaches to discuss subsequent Australian operas and opera productions through to the twenty-first century. With final chapters pulling threads from the two volumes together, *Opera, Emotion, and the Antipodes* establishes a model for constructing emotion history from multiple disciplinary perspectives.

The prime purpose of this book is to present, in small compass, clearly reasoned opinions of men who have treated the philosophy of art not less with simplicity of language than depth of understanding -- novelist and essayist not less than professed critic. A further purpose is to present a brief series of most brilliant descriptions of specific and famous works of art, architecture, sculpture, and painting, by men whose names are synonyms for all that is brilliant. Considered as a whole the collection centres upon a single point, namely, increase of appreciation and love of art behind which, said Rossetti, lies "passionate emotion," and the condition of which is "fundamental brain work." It is a book about men who live, eternal, in their buildings, pictures, sculptures. It is a book by men who have, for the most part, already eternalized
