Amateur radio enthusiasts in the US will be interested in Faraday, an open-source digital radio that runs on 915 MHz, which amateur radio enthusiasts may know better as the 33 cm band. You can ...

### Amateur Radio

Massively Networked: How the convergence of social media and technology is changing your life catches you up on the astonishing technological and social media innovations available now that can affect everything from your health, to your community, to how you think about earning a living. How you imagine your life literally matters now more than ever before. Massively Networked, a groundbreaking new book by practical visionary Pamela Lund, shows you how to engage this emerging force to create the lifestyle, the future, and the reality you want.

Celebrated journalist R. W. ("Johnny") Apple was a veteran political reporter, a New York Times bureau chief and an incisive and prolific writer. But the role he was most passionate about was food anthropologist. Known both for his restless wideopen mind and an appetite to match, Apple was also a culinary scholar: witty, wide-ranging and intensely knowledgeable about his subjects. Far Flung and Well Fed is the best of legendary Times reporter Apple's food writing from America, England, Europe, Asia and Australia. Each of the more than fifty essays recount extraordinary meals and little-known facts, of some of the world's most excellent foods lfrom the origin of an ingredient in a dish, to its history, to the vivid personalities including Apple's wife, Betsey/who cook, serve and eat those dishes. Far Flung and Well Fed is a classic collection of food writing: lively, warm and rich with a sense of place and taste and deserves to join the works of A.J. Liebling, Elizabeth David, M.F.K. Fisher and Calvin Trillin on the bookshelf.

Collected here are twenty of Nikola Tesla's essays, letters, and speeches all with figures. In total there are some 214 figures. Now you can read these famous articles as they were intended to be read. Included are A New System of Alternating Current Motors and Transformers; Experiments with Alternate Currents of Very High Frequency and Their Application to Methods of Artificial Illumination; Experiments with Alternate Currents of High Potential and High Frequency; On Light and Other High Frequency Phenomena; The Problem of Increasing Human Energy, With Special References to the Harnessing of the Sun's Energy; The Disturbing Influence of Solar Radiation on the Wireless Transmission of Energy; Famous Scientific Illusions; Electrical Oscillators; and many many more!
