Click card to see definition ? through the process of diffusion, both gases and liquids spread throughout the room by "bouncing" off the walls, going from a high concentration to a low concentration. Click again to see term ? 1/7

Diffusion Gizmo Flashcards | Quizlet

A, the settings shown in A B, the settings shown in B C, the settings shown in C D, the settings shown in D Explanation: Higher temperatures cause higher rates of diffusion, and lower particle masses produce higher rates of diffusion. In the Gizmo, however, the rate of particle movement and the rate of diffusion were affected much more by changes in particle masses than by changes in temperature.
