guru. Angus Stewart has worked for decades on selecting and breeding Australian plants to make them more gardener-friendly. Creating an Australian Garden not only passes on the knowledge gained from Angus's extensive experience as a plant breeder-it empowers us all to unlock the secrets of cleverly designed Australian gardens that provide year-round colour, vibrant foliage and havens for wildlife. Creating an Australian Garden contains practical tips on: planning a garden from scratch; adapting an existing garden; using water-saving methods; creating mounds and raised beds to ensure; the drainage many Australian plants require; growing native plants in containers; choosing the best plants for your environment; easy-to-follow basics of soil preparation, and 450 of the best Australian plant varieties, including many that are newly released. Find out how to choose the ideal plants for your climate, or create a microclimate to accommodate the spectacular native plants you'd like to grow. See how versatile native plants can be, becoming part of any garden style you envisage for your backyard. Most importantly, learn everything you need to know, from planning to planting, to allow you to create a stunning native garden, wherever you live.

In today's South, where fine gardening is a tradition, many homeowners and professional gardeners are discovering a vast "new" palette of plant materials—native plants. They are realizing that these native wildflowers, trees, shrubs, groundcovers, vines, and grasses are far better suited, and therefore easier to grow and maintain, than most of the imported plants that populate traditional landscapes. In this book, the authors offer an exciting vision of the many possibilities and advantages of "going native." Lavishly illustrated with more than 250 gorgeous color photographs, this book is both an introduction to more than 200 of the most familiar and easiest-to-find native plants of the South and a basic primer on how to use them effectively.

Native offers planting palettes and design themes, gardening techniques and inspiration for an original and exciting perspective on the very best of Australian local flora. When Kate Herd started experimenting with how she pruned and trained the native plants in her riverside garden in Melbourne, she made some amazing discoveries. A eucalyptus shrub she had cut right back to the ground reappeared as the most beautiful sprawling ground cover. Westringia was shaped to impersonate perfect English Box balls. And she found that Tasmanian beech trees could grow as a copse in small city courtyards. Jela had similar experiences in her own garden design practice and together Kate and Jela have explored the unique beauty and resilience of Australia's native plants. Known for their absolute versatility and hardiness in the garden, native plants also offer up original forms for cut flowers and sculpture. Garden designers Fiona Brockhoff and Sue Barnsley, Sculptor Tracey Deep and Artist Janet Lawrence all share their own love of Australian plants and how they incorporate them into their work. Chapters cover topics such as: Feature Foliage, Sculptural Forms, Pliability, Shady Spaces and Flowering Meadows.

An exciting and refreshing call to arms, *The Planthunter* is a new generation of gardening book for a new generation of gardener that encourages readers to fall in love with the natural world by falling in love with plants.

There are several good reasons why savvy gardeners cherish native plants in their landscapes. In this book, Coastal Maine Botanical Gardens executive director Maureen Heffernan provides information and inspiration for gardeners about how to choose the best plants for a variety of locations and provides tips on how to cope with challenging conditions. Heffernan discusses flowering perennials, foliage plants, grasses, ground covers, shrubs, and trees, and she provides sample garden plans designed by experts.

The Garden of Ideas tells an inspiring and engaging story of Australian garden design. From the imaginings of emigrant garden-makers of the late eighteenth century to the concerns of twenty-first-century gardeners, this book charts its way across four centuries through a handsome and satisfying fusion of images and text. The Garden of Ideas is embellished with an unparalleled array of images - paintings, drawings, prints, plans, and photographs - each richly evocative of their time and most never previously published. Unearthed from around Australia, and many from overseas, these images carry the story of Australian garden style down the years, in the process criss-crossing social and cultural history across the wide extremes of our continent. Richard Aitken, whose book *Botanical Riches* was published in 2006 to popular and critical acclaim, brings a lifetime of experience to *The Garden of Ideas*. He achieves fresh insights and presents our passion for garden-making with wit and flair. *The Garden of Ideas* is a valuable source book for the sophisticated gardener and an indispensable companion for the garden lover.
