Penguin Readers is an ELT graded reader series. Please note that the eBook edition does NOT include access to the audio edition and digital book. Written for learners of English as a foreign language, each title includes carefully adapted text, new illustrations and language learning exercises. Titles include popular classics, exciting contemporary fiction, and thought-provoking non-fiction, introducing language learners to bestselling authors and compelling content. The eight levels of Penguin Readers follow the Common European Framework of Reference for language learning (CEFR). Exercises at the back of each Reader help language learners to practise grammar, vocabulary, and key exam skills. Before, during and after-reading questions test readers' story comprehension and develop vocabulary. Viruses and Pandemics, a Level 6 Reader, is B1+ in the CEFR framework. The longer text is made up of sentences with up to four clauses, introducing future continuous, reported questions, third conditional, was going to and ellipsis. A small number of illustrations support the text. This book is about viruses and was written during the Covid-19 pandemic. Learn about bacteria and viruses - from the common cold to smallpox, polio, Ebola and the Zika virus. Then meet some of the scientists who discovered ways to prevent these diseases, and those who are working with viruses today. Visit the Penguin Readers website Register to access online resources including tests, worksheets and answer keys. Exclusively with the print edition, readers can unlock a digital book and audio edition (not available with the eBook).

appeared in the chapter. Connecting to Life/Job Skills: invites the reader to extend the biology information just learned into the living community through life skills and career information. Learning about careers related to biology expands one's knowledge of the kinds of opportunities available for education beyond high school and the need for science-trained people in the work force. Also invites the reader to look at the biological events taking place in the local community and to assess the effects of environmental conditions. Chronology of Famous Names in Biology: Scientists representing all countries, races, and religions are included—ranging in time from ancient Greek philosopher-scientists to modern day investigators. For each name, a brief summary of the accomplishment is given, along with the approximate date of the discovery or invention and the country where the work took place.

The language of medicine is complex, but learning it doesn't have to be. Using a conversational writing style and a logical, programmed approach, *Building a Medical Vocabulary with Spanish Translations*, 8th Edition starts with common words you hear everyday and adds new root words, prefixes, and suffixes to introduce you to key medical terminology. Additionally, this valuable text comes with a wealth of engaging review tools - such as interactive games, sound files, and Programmed Learning sections - to enhance your understanding of textbook terms and principles, polish your pronunciation skills, and help you get comfortable communicating in the language of health care. Easy-to-understand, conversational writing style makes reading and absorbing the material enjoyable. Programmed Learning sections allow you to actively participate in learning and get instant feedback on your progress.
