The Spine. Prepared in a readily accessible, amply illustrated format, this book is designed to equip practitioners with a detailed understanding of the underlying basis of the HVLA thrust technique and the best means to safely employ it in the effective management of a range of disorders of the spine and pelvic regions. The book is arranged in three sections to maximise understanding of what can be challenging areas to comprehend and effectively manage. Section One explores the biomechanics of movement and forces between adjacent vertebrae followed by a discussion of positioning and 'locking'. These chapters are then followed by a discussion about safety with particular reference to

the management of the cervical spine. A chapter on evidence – and what represents good medical evidence – concludes.

Section Two presents – using an ample array of clear photographs and useful summary boxes – over 40 HVLA techniques ranging from the atlanto-occipital joint (C0-C1) to the coccyx. Section Three concludes with treatment failures (often, technique derived) and analysis. Prepared by authors of international renown - and now with an associated website containing over 45 minutes of useful film footage - this book will be ideal for all manual therapy practitioners dealing with the management of the spine and pelvic areas. Presents the scientific basis of the HVLA thrust

Understanding one of the most fundamental areas of physical therapy: the nervous system and its relationship to musculoskeletal pain. Osteopath, lecturer, and author John Gibbons offers an accessible introduction to the peripheral nervous system (PNS). Alongside real case studies and guidelines for hands-on work with clients and patients, *The Vital Nerves* demystifies and makes accessible everything from how to diagnose nerve conditions to understanding how our cells communicate. Gibbons provides critical insights into the structure and functions of the PNS; the body's response to stimuli and how it knows what to do; the sympathetic and parasympathetic nervous systems; understanding
