Provides guidance to historic building owners and building managers, preservation consultants, architects, contractors, and project reviewers prior to treatment of historic buildings.

This book shows how vitamin A deficiency — before the vitamin was known to scientists — affected millions of people throughout history. It is a story of sailors and soldiers, penniless mothers, orphaned infants, and young children left susceptible to blindness and fatal infections. We also glimpse the fortunate ones who, with ample vitamin A-rich food, escaped this elusive stalker. Why were people going blind and dying? To unravel this puzzle, scientists around the world competed over the course of a century. Their persistent efforts led to the identification of vitamin A and its essential role in health. As a primary focus of today ' s international public health efforts, vitamin A has saved hundreds of thousands of lives. But, we discover, they could save many more were it not for obstacles erected by political and ideological zealots who lack a historical perspective of the problem. Although exhaustively researched and documented, this book is written for intellectually curious lay readers as well as for specialists. Public health professionals, nutritionists, and historians of science and medicine have much to learn from this book about the cultural and scientific origins of their disciplines. Likewise, readers interested in military and cultural history will learn about the interaction of health, society, science, and politics. The author ' s presentation of vitamin A deficiency is likely to become a classic case study of health disparities in the past as well as the present.

This volume presents a new approach to Spanish Baroque drama, inspired by Foucauldian discourse archeology, whose rare fusion of meticulous philology and ambitious theory will be exciting and fruitful both for the specialist of Spanish literature and for anyone invested in the history of European thought. Detailed readings are dedicated to some of the most prominent plays by Lope de Vega and Calder ó n de la Barca, both autos sacramentales (El viaje del alma; El divino Orfeo; La lepra de Constantino) and comedias (El castigo sin venganza, El pr i ncipe constante, El m é dico de su honra). The "archeological" perspective cast on the plays implies an integration of their discourse-historical "foils", from pagan antiquity through the Middle Ages and the Renaissance, as well as a discussion of related discourses, mainly theological, philosophical and historiographical. A separate "excursus" suggests a reconsideration of the common manner in which the discursive relation between the Middle Ages, the Renaissance, Mannerism and the Baroque is conceptualized.

Material from Classical Music (Eyewitness Companion) with updates. This book is a guide to every aspect of the long and ongoing story of Western classical music. It reveals in a stimulating and lively way the exceptionally gifted individuals who have shaped the musical landscape over a millennia, from the chanting monks of the middle ages to the bold exponents of minimalism of the last 100 years. Personal and creative profiles of composers, both major and minor, form the heart of the book and offer rich insights into the qualities of their music and an ideal introduction to the range and diversity of the Classical repertoire.

The story of an American pilot downed in Laos in 1967 offers an inspiring portrait of courage under fire, detailing his captures and escapes and his final trip to Hanoi, where he died in captivity, but not before inspiring other American pilots imprisoned there. Reprint. 15,000 first printing.
