Chapter 10 Crisis, Unrest, and Opportunity, 1300-1500. Chapter Summary. The Late Middle Ages in Europe has been called the "time of famine." It can also be called the "time of trouble"; it was in that period that Europe faced one of its most devastating challenges, the Black Death. In a four year period during the mid-fourteenth century, Europe ...

As the nomadic hunters and gatherers of the ancient Near East turned to agriculture for their livelihood and settled into villages, religious ceremonies involving dancing became their primary means for bonding individuals into communities and households into villages. So important was dance that scenes of dancing are among the oldest and most persistent themes in Near Eastern prehistoric art, and these depictions of dance accompanied the spread of agriculture into surrounding regions of Europe and Africa. In this pathfinding book, Yosef Garfinkel analyzes depictions of dancing found on archaeological objects from the Near East, southeastern Europe, and Egypt to offer the first comprehensive look at the role of dance in these Neolithic (7000-4000 BC) societies. In the first part of the book, Garfinkel examines the structure of dance, its functional roles in the community (with comparisons to dance in modern pre-state societies), and its cognitive, or symbolic, aspects. This analysis leads him to assert that scenes of dancing depict real community rituals linked to the agricultural cycle and that dance was essential for maintaining these calendrical rituals and passing them on to succeeding generations. In the concluding section of the book, Garfinkel presents and discusses the extensive archaeological data—some 400 depictions of dance—on which his study is based.

Since 2000, IOM has been producing world migration reports. The World Migration Report 2020, the tenth in the world migration report series, has been produced to contribute to increased understanding of migration throughout the world. This new edition presents key data and information on migration as well as thematic chapters on highly topical migration issues, and is structured to focus on two key contributions for readers: Part I: key information on migration and migrants (including migration-related statistics); and Part II: balanced, evidence-based analysis of complex and emerging migration issues.

Dionysos, with his following of satyrs and women, was a major theme in a big part of the figure painted pottery in 500-300 B.C. Athens. As an original testimonial of their time, the imagery on these vases convey what this god meant to his worshippers. It becomes clear that - contrary to what is usually assumed - he was not only appropriate for wine, wine indulgence, ecstasy and theatre. Rather, he was present in both the public and private sphere on many, both happy and sad, occasions. In addition, the vase painters have emphasized different aspects of Dionysos for their customers inside and outside of Athens, depending on the political and cultural situation.

The first cross-regional study to show that populism can have both positive and negative effects on democracy.

This collection of essays by twenty-one distinguished American historians reflects on a peculiarly American way of imagining the past. At a time when history-writing has changed dramatically, the authors discuss the birth and evolution of historiography in this country, from its origins in the late nineteenth century through its present, more cosmopolitan character. In the book's first part, concerning recent historiography, are chapters on exceptionalism, gender, economic history, social theory, race, and immigration and multiculturalism. Authors are Daniel Rodgers, Linda Kerber, Naomi Lamoreaux, Dorothy Ross, Thomas Holt, and Philip Gleason. The three American centuries are discussed in the second part, with chapters by Gordon Wood, George Fredrickson, and James Patterson. The third part is a chronological survey of non-American histories, including that of Western civilization, ancient history, the middle ages, early modern and modern Europe, Russia, and Asia. Contributors are Eugen Weber, Richard Saller, Gabriele Spiegel, Anthony Molho, Philip Benedict, Richard Kagan, Keith Baker, Joseph Zisk, Volker Berghahn, Charles Maier, Martin Malia, and Carol Gluck. Together, these scholars reveal the unique perspective American historians have brought to the past of their own nation as well as that of the world. Formerly writing from a conviction that America had a singular destiny, American historians have gradually come to share viewpoints of historians in other countries about which they write. The result is the virtual disappearance of what was a distinctive American voice. That voice is the subject of this book.

In the course of the so-called 'economic and financial crisis' from 2008 onwards, there has been a fierce debate about the role and purpose of the European Union. It was led in politics and the media just as in academia. The economic usefulness of the Euro has been discussed, and the political implications of a fostered European unification. Most often, the state of Europeanization has been presented as being without alternatives: no Europe without Greece; no Euro without Greece; no way back to the nation state in its old form. As a result, the debate on Europe was largely narrowed down to the very questions of the immediate crisis, namely economics and fi nance. Only a few voices held that the crisis in fact was one of politics, not of economics. And only late did politicians mention again that Europe is more than the EU. Alternative views of Europe, however, were scarce and often presented full of consequences. It thus came without much surprise that the lacking imaginative power of politicians as well as intellectuals was criticized. The idea for this volume sprang from that situation. The editors invited scholars from various disciplines to present them with ways of imagining Europe that go beyond the rather limited view of EU institutions. How was, how is Europe imagined? Which memories are evoked, which visions explicated? Which counter-narratives to prominent discourses are there?

The Roman empire tends to be seen as a whole whereas the early middle ages tends to be seen as a collection of regional histories, roughly corresponding to the land-areas of modern nation states. As a result, early medieval history is much more fragmented, and there have been few convincing syntheses of socio-economic change in the post-Roman world since the 1930s. In recent decades, the rise of early medieval archaeology has also transformed our source-base, but this has not been adequately integrated into analyses of documentary history in almost any country. In *Framing the Early Middle Ages* Chris Wickham combines documentary and archaeological evidence to create a comparative history of the period 400-800. His analysis embraces each of the regions of the late Roman and immediately post-Roman world, from Denmark to Egypt. The book concentrates on classic socio-economic themes, state finance, the wealth and identity of the aristocracy, estate management, peasant society, rural settlement, cities, and exchange. These give only a partial picture of the period, but they frame and explain other developments. Earlier syntheses have taken the development of a single region as 'typical', with divergent developments presented as exceptions. This book takes all different developments as typical, and aims to construct a synthesis based on a better understanding of difference and the reasons for it.

This companion analyzes the different ways in which societies from Oceania to Europe and beyond were connected in the period 600-900 CE.

The colorful history of the Hawaiian Islands, since their discovery in 1778 by the great British navigator Captain James Cook, falls naturally into three periods. During the first, Hawaii was a monarchy ruled by native kings and queens. Then came the perilous transition period when new leaders, after failing to secure annexation to the United States, set up a miniature republic. The third period began in 1898 when Hawaii by annexation became American territory. The Hawaiian Kingdom, by Ralph S. Kuykendall, is the detailed story of the island monarchy. In the first volume, "Foundation and Transformation," the author gives a brief sketch of old Hawaii before the coming of the Europeans, based on the known and accepted accounts of this early period. He then shows how the arrival of sea rovers, traders, soldiers of fortune, whalers, scoundrels, missionaries, and statesmen transformed the native kingdom, and how the foundations of modern Hawaii were laid. In the second volume, "Twenty Critical Years," the author deals with the middle period of the kingdom's history, when Hawaii was trying to insure her independence while world powers maneuvered for dominance in the Pacific. It was an important period with distinct and well-marked characteristics, but the noteworthy changes and advances which occurred have received less attention from students of history than they deserve. Much of the material is taken from manuscript sources and appears in print for the first time in the second volume. The third and final volume of this distinguished trilogy, "The Kalakaua Dynasty," covers the colorful reign of King Kalakaua, the Merry Monarch, and the brief and tragic rule of his successor, Queen Liliuokalani. This volume is enlivened by such controversial personages as Claus Spreckels, Walter Murray Gibson, and Celoso Caesar Moreno. Through it runs the thread of the reciprocity treaty with the United States, its stimulating effect upon the island economy, and the far-reaching consequences of immigration from the Orient to supply plantation labor. The trilogy closes with the events leading to the downfall of the Hawaiian monarchy and the establishment of the Provisional Government in 1893.
