Anatomy & Physiology for the Manual Therapies 1e is designed to meet the specific needs of students preparing for careers in the manual therapies, such as massage therapy and careers as physical therapy assistants. This book provides the most appropriate depth of coverage for each body system -- in both narrative and visuals -- and by including relevant applications linking the content to situations they will face in their careers. Specially written applications with a focus on massage and physical therapy are included. An outstanding illustration program is also integrated to highlight important concepts and special diagrams are presented that point to origin, insertion, and innervation of muscles. This is crucial knowledge for massage therapists, physical therapists, and occupational therapists.

This third edition apprises users of the MMPI-2/MMPI-2-Restructured Form (RF) for the ever-changing landscape of this dynamic personality/psychopathology instrument and its expanding utility in a variety of contexts. Two new chapters addressing the RC scales and the MMPI-2-RF are included in this updated text. Additionally, over 450 new references have been incorporated into the book, with information gathered and organized for practical clinical and forensic applications. The codetype interpretation chapter has expanded its sections with more in-depth feedback information and treatment considerations for clinicians to help in facilitating the formulation of treatment recommendations and strengthening therapeutic relationships with their clients. A number of special scales with clinical and forensic applications are also covered in this edition. An important section has been added addressing the MMPI and suicide. This new edition is a must-have resource that will inform and guide users of the MMPI-2 and MMPI-2-RF in their daily practices, and assist researchers in conceptualizing the operating characteristics and configural relationships among the various scales and indices that comprise this instrument. From simple single scale interpretation to complex configural relationships, this text addresses a broad bandwidth of interpretive information designed for text users' at all levels of sophistication.

This book presents the subject matter tailor-made for the latest syllabus of North-Eastern Hill University (NEHU) to enable its students to study the course material through a single book without having to refer to multiple sources and comprehend the subject in simple, understandable language.Key Features• Covers the syllabus of NEHU• Includes the highlights of the Indian Company Law, 2013• Explains complicated provisions in easily comprehensible language with the help of illustrations and analogies• Quotes Indian and English cases at appropriate places with a view to ensure necessary authenticity and clarity on the subject• Includes model question papers

MAT000000 [BISAC]; MAT008000 [BISAC]

Any questions you have about 2D or 3D animation in this new digital age are answered in this comprehensive guide for all budding digital animators, games artists and media production students. It is lavishly illustrated with inspirational colour throughout to show you what you can achieve. Whether you want to create moving digital imagery for TV, computer games, or new media you need to understand the production and creative processes, the constraints of each and how they fit together. Ensure you have all you need at your fingertips to compete in this fast-moving arena with this unique book and web package. www.guide2computeranimation.com provides the moving imagery outcomes of some of the animation discussed in the case studies chapter, where top FrameStore-CRC and 3 Ring Circus creatives give you their invaluable behind the scenes perspectives. In addition there are non-software specific 3D tutorials and direct links to a comprehensive range of related websites with further downloadable resources to make sure you stay up-to-date. Marcia Kuperberg is Deputy Head of the School of Media, Arts & Technology, West Herts College, UK. Contributions are also included from Martin Bowman, Rob Manton and Alan Peacock.

Chapter summaries, learning objectives, and key terms along with multiple choice, fill-in-the-blank, true/false, discussion, and case study questions help students with retention and better test results. Prepared by Nancy Shontz of Grand Valley State University. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Fully revised to match the more traditional sequence of course materials, this full-color second edition presents the basic principles and methods of thermodynamics using a clear and engaging style and a wealth of end-of-chapter problems. It includes five new chapters on topics such as mixtures, psychrometry, chemical equilibrium, and combustion, and discussion of the Second Law of Thermodynamics has been expanded and divided into two chapters, allowing instructors to introduce the topic using either the cycle analysis in Chapter 6 or the definition of entropy in Chapter 7. Online ancillaries including a password-protected solutions manual, figures in electronic format, prepared PowerPoint lecture slides, and instructional videos are available.

Written by a team of best-selling authors, BIOLOGY: THE UNITY AND DIVERSITY OF LIFE, 14th Edition reveals the biological world in wondrous detail. Packed with eye-catching photos and images, this text engages students with applications and activities that encourage critical thinking. Chapter opening Learning Roadmaps help students focus on the topics that matter most and section-ending "Take Home Messages" reinforce key concepts. Helpful in-text features include a running glossary, case studies, issue-related essays, linked concepts, self-test questions, data analysis problems, and more. The accompanying MindTap for Biology is the most engaging and easiest to customize online solution in Biology. Known for a clear, accessible style, BIOLOGY: THE UNITY AND DIVERSITY OF LIFE, 14th Edition puts the living world of biology under a microscope for students to analyze, understand, and enjoy! Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Take weight off fast with Dr. Ian Smith's Customized 4 Day Diet Modules! You can follow The 4 Day Diet straight through for a month with stunning results. But only you know how you eat—and how you diet. Customize your own program in whatever order works best for you—or just repeat the modules you like best. Only the first two are doctor's orders: Induction (detox/cleansing) Transition (to reintroduce food groups) Protein Stretch (to avoid plateaus) Smooth (eat pizza or even French fries!) Push (the sprint—you're almost there) Pace (catch your breath and keep going) Vigorous (lose those last few pounds—for good!) Dr. Ian Smith's diets really work. And his motivating tips and tricks will help you stay on the program, enjoy your progress, and feel your success from day one. Features more than 60 recipes for meals and snacks—food that will make you forget you're on a diet!
