CIBSE Knowledge falls into the following categories: CIBSE guides are the flagship CIBSE publications, and offer concise guidance on the fundamentals of building services engineering. Their primary aim is to provide the data necessary to enable designers to make decisions in everyday working situations.

CIBSE - Building Services Knowledge

The objective of this Guide is to present a package of measures which will reduce the potential for injury, death, property and financial loss to an acceptable level. A concerted effort has been made to provide information within this Guide that can be used internationally.

CIBSE - Building Services Knowledge

So considering the brickwork layer, and referring to the data in Figure 1, the exposed bricks have an R of 0.105/0.77 = 0.136 m² K/W and the exposed mortar 0.105/0.94 = 0.112 m² K/W. CIBSE Guide A recommends that if the R values differ by no more than 0.1 m² K/W then the R value for the major element may be used (and in this case the difference is 0.136 – 0.112 = 0.024 m² K/W), so the R for this layer is taken as 0.136 m² K/W.
