Common Core Connections: Math is the perfect tool for helping third grade students master Common Core math skills. The Common Core Standards for Math in third grade focus on four main areas: multiplication and division within 100, developing an understanding of fractions, rectangular arrays and area, and two-dimensional shapes. This resource provides focused practice pages for targeting and reinforcing these and other third grade math skills while helping students connect comprehension with knowledge and application. Connecting the standards to content has never been easier with the Common Core Connections series for Math. The Common Core Connections series provides teachers with a skill assessment and analysis to help determine individualized instruction needs. Focused, comprehensive practice pages and self-assessments guide students to reflection and exploration for deeper learning! Standards correlations are printed on each page to make planning and documentation simple. This series is an ideal resource for differentiation and remediation. Each 96-page book includes a skill assessment, assessment analysis, Common Core State Standards Alignment Matrix, and answer key.

#1 bestselling author and popular radio and television host Glenn Beck considers the hot-button issue of education in the US, exposing the weaknesses of the Common Core school curriculum and examining why liberal solutions fail. Public education is never mentioned in the constitution. Why? Because our founders knew that it was an issue for state and local governments—not the federal one. It's not a coincidence that the more the federal government has inserted itself into public education over the years, the worse our kids have fared. Washington dangles millions of dollars in front of states and then tells them what they have to do to get it. It's backdoor nationalization of education—and it's leading us to ruin. In *Conform*, Glenn Beck presents a well-reasoned, fact-based analysis that proves it's not more money our schools need—it's a complete refocusing of their priorities and a total restructuring of their relationship with the federal government. In the process, he dismantles many of the common myths and talking points that are often heard by those who want to protect the status quo. Critics of the current system are just "teacher bashers"... Teachers' unions put kids first... Homeschooled kids suffer both academically and socially... "local control" is an excuse to protect mediocrity... Common Core is "rigorous" and "state led"... Critics of Common Core are just conspiracy theorists... Elementary school teachers need tenure... We can't reform schools until we eradicate poverty... school choice takes money away from public schools... Charter schools perform poorly relative to public schools. There is no issue more important to America's future than education. The fact that we've yielded control over it to powerful unions and ideologically driven elitists is inexcusable. We are failing ourselves, our children, and our country. *Conform* gives parents the facts they need to take back the debate and help usher in a new era of education built around the commonsense principles of choice, freedom, and accountability.
