Cordwood masonry is a method of log building that is NOT like standard log home construction. Instead of using long logs that run the length of the walls, this style uses short logs of a uniform length (typically from 12-24 inches, though it can be more or less) laid with the end grain facing out like this:

10 FAQ's About Cordwood For Absolute Beginners ...

Cordwood construction (also called "cordwood masonry", "cordwood building", "stackwall construction", "stovewood construction" or "stackwood construction") is a term used for a natural building method in which short logs are piled crosswise to build a wall, using mortar or cob to permanently secure them. This technique can use local materials at minimal cost.

Cordwood construction - Wikipedia

Nearly four decades ago, Richard and Becky Flatau, built their mortgage-free, cordwood home in northern Wisconsin. Since then, as Directors of Cordwood Construction Resources, the couple has written books, created videos, taught workshops, organized Cordwood Conferences and provided earth-friendly choices for cordwood owner/builders.
