~~Lumbo-sacral Lesions – Sunningdale
Osteopathic Clinic~~

Craniosacral therapy is a form of bodywork or alternative therapy that uses gentle touch to palpate the synarthrodial joints of the cranium. It is based on fundamental misconceptions about the physiology of the human skull and is promoted as a cure-all for a variety of health conditions. CST was invented in the 1970s by John Upledger, an osteopathic physician, as an offshoot of cranial osteopathy, which had been devised in the 1930s by William Garner Sutherland. CST is a pseudoscience, and its p

to the cranial mobility and develop great precision in utilizing cranial techniques.

~~Loretta's Therapeutic Massage— Manual Osteopathic Therapist~~

The osteopathic cranial technique was first described in the 1930s by William Garner Sutherland, DO. 6 According to the treatment model, intrinsic rhythmic movements of the central nervous system, termed the primary respiratory mechanism (PRM), create pulsations of cerebrospinal fluid and specific relational oscillations of the dural membranes, which can be directly palpated via corresponding articular motions of the cranial bones and the sacrum. 6
