The AC wall voltage is 120V (rms). But the actual peak value is $\sqrt{2} * 120 = 169.7V$. This doubled is 339V which is very close to the values you are seeing. I would expect your 120V rms wall voltage

Where To Download

is really more
like 124V rms.
This would give
an actual peak
voltage of
 $124 * \sqrt{2} =$
175V.
