engine's Repair Manual (Lookup Repair Manual by Model Number).

How do I Find my engine specifications? | Briggs & Stratton

To determine how much torque is needed for each bolt it is necessary to divide the number of bolts by the total amount of cylinder pressure the engine produces. If an engine produces 1,500 pounds of pressure and the cylinder head has 8 bolts, then each bolt must be tightened to 187 foot-pounds of torque to secure the cylinder head to the block.
