### Flash Guide Number App

Download Number Flash and enjoy it on your iPhone, iPad, and iPod touch. Helps children transition from counting to number understanding. Watch a video demonstration of Number Flash in action: <http://studysmart.com/www.studysmart.com/VideoBankUsinNumberFlash.html> A ten frame with dots flashes on the screen (you can choose the number of seconds it appears on the screen)....

### Number Flash on the App Store

Everyone. 177. Add to Wishlist. Manual Flash Calculator (Free Edition) provides a handy utility for accurately determining flash-subject distance. It's quick and easy to use for tricky lighting...

### Manual Flash Calculator (Free) - Apps on Google Play

The flash guide number tells you - in a general sense - how powerful the flash is and hence, how much of an area it can illuminate. If your goal is to take intimate portraits in a small room, you don't need flashes with huge guide numbers.

### Flash Guide Number

Simple flash guide number calculator. This is just a simple guide number calculator that solves for distance, but you can play around with all of the different variables and see how they're related. You can also plug in a few anchor points and use those for your baseline starting points when you go out and shoot.

### Guide Numbers Explained for Manual Flash - Calculator ...

Using the guide number to calculate flash exposure. Well, if we want to be more methodical than just looking at the back of our camera display, we can use the Guide Number of our flash. Keep in mind that the GN is given for a specific zoom setting on the flash-head. Zooming from wide to tele on our flash, changes the Guide Number!

### Tutorial: How to use the guide number of your flash - Tangents

Guide Number is a tool to determine exposure of Direct Flash with Manual flash power levels, to automatically deal with the Inverse Square Law, making the math be trivial [www.scantips.com](http://www.scantips.com) Menu of the other Photo and Flash pages here

### Understanding Camera Flash Guide Numbers, plus GN Calculator

The guide number of a flash is the product of the *f*/stop of the exposure at a given distance at ISO 100. Wikipedia has a whole page on it here. But that's all pretty math-centered and kinda inverse-squarish. And you really do not need to know that stuff to use GN to zero in on a first exposure.

### Strobist: Guide Number: Your Free Flash Meter

GN = Subject Distance from Flash Source x *f*/Stop. Guide numbers are based on a simple mathematical equation that states: the light output of an electronic flash is equal to the distance of the flash unit from the subject multiplied by the lens aperture, or *f*/stop. ... Elec. Store #0906712 Elec. & Home App. Serv. Deal. #0907905; Sec. Hd. Deal ...

### Understanding Guide Numbers | B&H Explora

Example: Guide number = 48 (m) and the distance is 6 meters; one needs an aperture of *f* /8 (GN 48  $\div$  6 m = *f* /8). Example for finding a distance. Suppose a photographer wants to shoot with an aperture of *f* /2.8 and the guide number is 28 (m) / 92 (ft). The flash device must be 10 meters (33 feet) from the subject.

### Guide number - Wikipedia

The same flash at 20 feet, for example, would use an aperture of *f*/4 (80=20=4). I suppose the argument can be made that automatic flash and TTL metering have rendered guide numbers almost obsolete. In the early days of electronic flash, there was no such thing as TTL metering. Everything was manual.

### Adobe Flash Player

The higher the guide number, the greater the distance at which the light from the flash is sufficient for optimal exposure. The formula for calculating the guide number is as follows: Guide number (GN)=distance (meters)  $\times$  aperture (f-number)

### Flash Level (Guide Number) - Nikon | Imaging Products

With AppFlash, discover customized content from dozens of apps to get recommendations for movies, music, restaurants and more. Due to inactivity, your session will end in approximately 2 minutes. Extend your session by clicking OK below. OK. Due to inactivity, your session has expired. ...

### AppFlash FAQs - Verizon

This flash power variable can easily be compensated for in the guide number equation by reducing one of the other variables. For instance, if using a flash with a guide number of 100 (at ISO 100) at 1/4 power and photographing a subject at 25' away, you will now require an aperture of *f*/2 (which is 1/4 the original example's given aperture).

### A Guide to On-Camera Flash | B&H Explora

"Most apps give you the option to either back up your data to the flash drive or back up your data to the flash drive and delete it from your iPhone. Be careful not to accidentally delete both your original data and the backup copy."
