Miss Prime and her animal students explore fractions by finding many examples in the world around them.

Introduces fractions by using the pieces of a chocolate bar to demonstrate the different parts that make up a whole item

The Common Core State Standards for Mathematics challenges students to become mathematical thinkers, not just mathematical "doers." In her new resource, professional developer Marian Small shows teachers how to uncomplicate the teaching of fractions by focusing on the most important fraction ideas that students need to grasp. The book is organized by grade level beginning with Grade 1, where the first relevant standard is found in the geometry domain, and ending with Grade 7, where the focus is on operations with rational numbers and proportional thinking.
