FROM THE AUTHOR OF THE #1 NATIONAL BESTSELLER JUSTICE ON TRIAL Stunned by the turbulence of the 2020 election, millions of Americans are asking the forbidden question: what really happened? It was a devastating triple punch. Capping their four-year campaign to destroy the Trump presidency, the media portrayed a Democratic victory as necessary and inevitable. Big Tech, wielding unprecedented powers, vaporized dissent and erased damning reports about the Biden family's corruption. And Democratic operatives, exploiting a public health crisis, shamelessly manipulated the voting process itself. Silenced and subjected, the American people lost their faith in the system. RIGGED is the definitive account of the 2020 election. Based on Mollie Hemingway's exclusive interviews with campaign officials, reporters, Supreme Court justices, and President Trump himself, it exposes the fraud and cynicism behind the Democrats' historic power-grab. Rewriting history is a specialty of the radical left, now in control of America's political and cultural heights. But they will have to contend with the determination, insight, and eloquence of Mollie Hemingway. RIGGED is a reminder for weary patriots that truth is still the most powerful weapon. The stakes for our democracy have never been higher.

In the words of economist and scholar Arnold Kling, Martin Gurri saw it coming. Technology has categorically reversed the information balance of power between the public and the elites who manage the great hierarchical institutions of the industrial age government, political parties, the media. The Revolt of the Public tells the story of how insurgencies, enabled by digital devices and a vast information sphere, have mobilized millions of ordinary people around the world. Originally published in 2014, this updated edition of The Revolt of the Public includes an extensive analysis of Donald Trump's improbable rise to the presidency and the electoral triumphs of Brexit and concludes with a speculative look forward, pondering whether the current elite class can bring about a reformation of the democratic process, and whether new organizing principles, adapted to a digital world, can arise out of the present political turbulence. "All over the world, elite institutions from governments to media to academia are losing their authority and monopoly control of information to dynamic amateurs and the broader public. This book, until now only in samizdat (and Kindle) form, has been my #1 handout for the last several years to anyone seeking to understand this unfolding shift in power from hierarchies to networks in the age of the Internet." --Marc Andreessen, co-founder, Netscape and Andreessen Horowitz "We are in an open war between publics with passionate and untutored interests and elites who believe they have the right to guide those publics. Gurri asks the essential question: can liberal representative democracy survive the rise of the publics? --Roger Berkowitz, Founder and Academic Director of the Hannah Arendt Center, Professor of Politics and Human Rights at Bard College

The author of Killer Choice, a thriller "full of shocks and twists you won't see coming" (Lee Child), delivers another nail-biting novel about a hit-and-run and a lie that goes horribly wrong. Her son accidentally kills a man. They

cover it up. Then everything goes wrong. When eighteen-year-old Joshua Mayo takes a man's life in a terrible accident, he leaves the scene without reporting the crime to the police. He hopes to put the awful night behind him and move on with his life. But, of course, he ends up telling his mother, Karen, what happened. Karen has raised Joshua on her own in Cedar Rapids, Iowa--and she'd thought they'd finally made it. He was doing well in school and was only months away from starting college at his dream school. After hearing his dark confession, she's forced to make a choice no parent should have to make. A choice that draws them both into a web of deceit that will change their lives forever--if they can make it out alive.

In *Blade of Secrets*, a new YA fantasy adventure from the author of *Daughter of the Pirate King*, a teenage blacksmith with social anxiety is forced to go on the run to protect the world from the most powerful magical sword she's ever made. Eighteen-year-old Ziva prefers metal to people. She spends her days tucked away in her forge, safe from society and the anxiety it causes her, using her magical gift to craft unique weapons imbued with power. Then Ziva receives a commission from a powerful warlord, and the result is a sword capable of stealing its victims' secrets. A sword that can cut far deeper than the length of its blade. A sword with the strength to topple kingdoms. When Ziva learns of the warlord's intentions to use the weapon to enslave all the world under her rule, she takes her sister and flees. Joined by a distractingly handsome mercenary and a young scholar with extensive knowledge of the world's known magics, Ziva and her sister set out on a quest to keep the sword safe until they can find a worthy wielder or a way to destroy it entirely.

From the editor in chief of Breitbart News, a firsthand account of how the establishment media became weaponized against Donald Trump and his supporters on behalf of the political left. Alex Marlow was just a twenty-one-year-old UC Berkeley student when renowned media mogul Andrew Breitbart hired him as his first employee. Breitbart began mentoring Marlow on how to fight the culture war one headline at a time and to remain resilient in the face of personal attacks. Now, in this eye-opening and timely book, Marlow explains how the establishment press destroyed its own credibility with a relentless stream of "fake news" designed to smear Donald Trump and his supporters while advancing a leftist agenda. He also reveals key details on how our information gatekeepers truly operate and why America's "fake news" moment might never end. Breitbart and Trump began banging the drum about "fake news" during the 2016 election, and it resonated with millions of voters because they intuitively knew the corporate media was willing to say or write anything to achieve their political ends. It's a battle cry that continues to this day. Alex and his team of researchers elucidate the stunning details of the key "fake news" moments of the Trump era and take a deep dive into some of the right's favorite media targets: from Bloomberg, CNN, The Washington Post, and The New York Times to the tech elite in Silicon Valley. Deeply researched and eye-opening, *Breaking the News* rips back the curtain on the inner workings of how the establishment media weaponizes information to achieve their political and cultural ends.

"Witty, compelling, and just plain fun to read . . ." —Evelyn Lamb, *Scientific American*

The Freakonomics of math—a math-world superstar unveils the hidden beauty and logic of the world and puts its power in our hands. The math we learn in school can seem like a dull set of rules, laid down by the ancients and not to be questioned. In *How Not to Be Wrong*, Jordan Ellenberg shows us how terribly limiting this view is: Math isn't confined to abstract incidents that never occur in real life, but rather touches everything we do—the whole world is shot through with it. Math allows us to see the hidden structures underneath the messy and chaotic surface of our world. It's a science of not being wrong, hammered out by centuries of hard work and argument. Armed with the tools of mathematics, we can see through to the true meaning of information we take for granted: How early should you get to the airport? What does "public opinion" really represent? Why do tall parents have shorter children? Who really won Florida in 2000? And how likely are you, really, to develop cancer? *How Not to Be Wrong* presents the surprising revelations behind all of these questions and many more, using the mathematician's method of analyzing life and exposing the hard-won insights of the academic community to the layman—minus the jargon. Ellenberg chases mathematical threads through a vast range of time and space, from the everyday to the cosmic, encountering, among other things, baseball, Reaganomics, daring lottery schemes, Voltaire, the replicability crisis in psychology, Italian Renaissance painting, artificial languages, the development of non-Euclidean geometry, the coming obesity apocalypse, Antonin Scalia's views on crime and punishment, the psychology of slime molds, what Facebook can and can't figure out about you, and the existence of God. Ellenberg pulls from history as well as from the latest theoretical developments to provide those not trained in math with the knowledge they need. Math, as Ellenberg says, is "an atomic-powered prosthesis that you attach to your common sense, vastly multiplying its reach and strength." With the tools of mathematics in hand, you can understand the world in a deeper, more meaningful way. *How Not to Be Wrong* will show you how.
