Strategic Management: Text and Cases, 2nd Edition, by Dess/Lumpkin/Eisner is both readable and rigorous - written for today's student. A rocket-ship in its first edition, the revision continues to provide solid treatment of traditional topics in strategic management, as well as contemporary topics like entrepreneurship, knowledge management, and internet strategies. The prestigious author team understands the importance of thorough, modern concepts illustrated by rich, relevant and teachable cases. The new case selections emphasize variety, currency, and familiar company names. The cases are up-to-date in terms of both financial data and strategic issues. This group of cases gives both instructors and students unparalleled quality and variety. Based on consistent reviewer feedback, these selections combine comprehensive and shorter length cases about well known companies.

Exploring the relationship between competition law and technology pools, this book provides general-purpose details of the biotechnology patent pool scheme while discussing historical developments, approaches of the US Department of Justice, Federal Trade Commission, and the European Union Competition Commission via EU regulations. In addition to these regulatory approaches and evolution in concept and theory of technology pools, this book illustrates relationship issues including tying arrangements and essential facility consideration vis-à-vis technology pools. It analyzes the modalities of forming such pools in the area of biotechnology, specifically illustrating that the formation of technology pools is possible and can be safely undertaken, and proposes a viable solution and structure. Patent pools in the biotechnology industry will pave the way towards open collaborative research, reducing patent thickets. Formation of such pools will increase access to various technology and patents otherwise out of bounds, resulting in a reduction of licensing costs and a spur in the development of new solutions. Most importantly, such pools will reduce the frequency of patent toll gates, making the entire spectrum of research interesting from the perspective of researchers as well as investors. This book will be an aid to researchers studying intellectual property, patents, and biotechnology, as well as to interest groups including funding agencies, venture funds, angel investors, and proponents of the open-source movement.

Ask Dr. Mueller captures the glamour and grittiness of Cookie Mueller's life and times. Here are previously unpublished stories - wacky as they are enlightening - along with favorites from *Walking Through Clear Water in a Pool Painted Black* and other publications. Also the best of Cookie's art columns from *Details* magazine, and the funniest of her advice columns from the *East Village Eye*, on everything from homeopathic medicine to how to cut your cocaine with a healthy substance. This collection is as much an autobiography as it is a map of downtown New York in the early '80s - that moment before *Bright Lights*, *Big City*, before the art world exploded, before New York changed into a yuppie metropolis, while it still had a glimmer of bohemian life.

"One icy winter's evening in Budapest, a man runs straight into John Taylor as he walks home through the narrow streets. John falls over into the snow and looks up at the man's face. 'I felt very afraid. Because what I saw was me. My face looking down at me. My mouth saying sorry.' Who is the man, and how will John's life change?"
