This textbook will prove invaluable to teacher educators, teachers, educational psychologists, and any professional who is involved with teaching children to read. It provides a detailed examination of the processes that are involved in achieving fluent word reading skills and ability to comprehend written texts. Understanding these processes and their development empowers teachers to select appropriate, evidence-based teaching strategies and thus teach children more effectively. The book is in four parts: Part 1 provides the reader with a Tutorial Review covering essential knowledge about language, and presenting the two dimensions of the Simple View of Reading. Part 2 concentrates on the word reading dimension, with chapters on processes in skilled word reading, the development of these processes, and practical advice on research validated teaching methods to develop children ' s word reading skills. Part 3 turns to the language comprehension dimension, with chapters on the comprehension of oral and written language, and on teaching reading comprehension. Part 4 introduces the reader to assessment practices and methods of identifying children with difficulties in either or both dimensions of the Simple View, and considers children with word reading difficulties and children with specific comprehension difficulties, describing effective evidence-based interventions for each type of difficulty.

Expectations in primary English are high, particularly in reading. There is an emphasis on inference and deduction together with vocabulary development: two key elements for preparing pupils to access texts at a higher level. At the same time, there is also a change in the rhetoric around guided reading with teachers trying different pedagogies in order to fully prepare pupils for the demands of the reading curriculum. This book explores the various approaches to developing higher level readers.

With chapter sequencing following the new Curriculum, this book supports trainee Primary school teachers to make use of the opportunities presented in the new National Curriculum for effective and engaging Mathematics teaching. Covering all of the areas of the new Curriculum for primary mathematics and offering insight into effective teaching, this book helps students connect what they need to teach with how it can be taught. Exploring opportunities in the new curriculum for creative and imaginative teaching, it shows readers how to capitalize on opportunities to develop children's reasoning and problem solving skills. It explores how to make links between mathematics and children's lived experiences to enhance their learning and enables trainees to develop an ability to plan with discernment, making the most of existing thinking and research as well as building confidence in adapting and customizing ideas. Includes the full National Curriculum Programme of Study for Maths, key stages 1 and 2 as a useful reference for trainee teachers. Other books in this series include: Primary Science for Trainee Teachers and Primary English for Trainee Teachers

This volume develops a theoretical and critical foundation for understanding "maladministration"—the phenomena of harmful administrative and organisational behaviours in educational systems. Chapter authors provide theoretical and practice-based perspectives across international contexts regarding common destructive practices that occur in educational organisations, such as negligence and mistreatment of people, professional dishonesty, fraud and embezzlement, abuse of power, and corrupt organisational cultures. International Perspectives on Maladministration in Education shines a light on this complex topic by examining various practices at individual, group, organisational, and system levels; the contexts and influences that give rise to them; and potential remedies to ensure more accountable, just, and safe institutions.

Teaching in Post-14 Education & Training provides a skillfully balanced mix of essential theory and practical guidance to support you if you are studying an ' education and training ' qualification. It covers fundamental background information such as key philosophies and concepts, current policy and practice, key thinkers and ideas, and includes a useful chronology. More importantly it also provides the tools to help you approach the classroom with confidence, covering fundamental issues such as teaching and learning, assessment, resources, and course design. Through its pedagogical features the book also offers you opportunities to pause and reflect, as well as practical exercises, templates and examples of student work. Key features of this new edition include: • Links to the latest Professional Standards for Teachers and Trainers • Updating of the legislative and policy context • Supporting learning with technology • Planning for equality and diversity • Embedding language and literacy This is the definitive textbook on teaching, learning and assessment for those training to work in the post-14 sector.

The essential teaching theory and practice text for primary English. Covering the skills of planning, monitoring and assessment and class management, it relates these specifically to primary English. With full coverage of the theory and practice required for effective and creative English teaching, this text is an essential guide for all trainees working towards QTS. Practical guidance and features support trainees throughout to translate this learning to the classroom, embed ICT in their lessons and to understand the wider context of their teaching. This 7th edition is updated in line with the new National Curriculum.

From the ebook Preface: "This book majors on the presentation of empirical evidence in the form of data. The most digestible form for communicating such material is through the use of Tables and Figures, generally graphs. Consequently, the book has a great many Tables and Figures and the latter are often in colour. Viewing on a device capable of rendering colours is therefore recommended although monochrome will be adequate in most cases." The Empathy Gap proposes the thesis that men and boys are extensively disadvantaged across many areas of life, including in education, healthcare, genital integrity, criminal justice, domestic abuse, working hours, taxation, pensions, paternity, homelessness, suicide, sexual offences, and access to their own children after parental separation. The claim is justified in the book by empirical evidence, mostly but not exclusively from the UK, involving nearly 1,000 references, 179 Figures and 49 Tables. To most people, of both sexes, this will appear to be a perverse perspective as disadvantage has become the province of women, girls and minorities, not males. Yet the empirical case supporting the disadvantages suffered by men and boys is undeniable to the objective mind. But if this is so, why is the popular perception that males are privileged whereas disadvantage is the province of the opposite sex? Why do the male disadvantages go largely unremarked, by both sexes, if they are so pervasive? Presenting the case for widespread and substantial male disadvantage is also a challenge to the usual hegemonic paradigm of feminist theory. These issues are addressed within The Empathy Gap by presenting an entirely different orientation on the social psychology of relations between the sexes. Out goes the idea of an oppressive patriarchy. Instead, a man's participation in the human pair bond is seen to be altruistic, a phenomenon arising originally from evolution and enacted in the individual via the emotional psyche. This is the origin of an asymmetry in the perception of the sexes which normalises the preferencing of females and therefore inevitably disadvantages males as a corollary. The successful evolved strategy involves male utility and relative male disposability, the latter being facilitated by a muted empathy for males, by both sexes - the empathy gap. Rather than working to overcome this male disposability, as a true egalitarian movement would have done, feminism has fed upon it and amplified it. The feminist project relies upon the true state of affairs remaining unacknowledged, and the empathy gap is instrumental in its own invisibility. In respect of this theory, the author makes no claim for originality. The ideas presented have been circulating within the sub-culture for decades. However, the focus of the book is to show how these ideas are manifest in practice.

Prepare for the 2014 KS2 SATs with Scholastic's Practice Papers. Trusted by teachers and parents, Scholastic's Practice Papers were created in response to the new Grammar, Punctuation and Spelling test for children in Year 6. The Practice Papers will help your child achieve to the best of their ability. * Essential practice papers for the 2014 National Tests to help your child prepare with confidence. * 100% in line with the tests - the most authentic practice tests available. * Each pack comes with three complete practice tests, an accompanying mark scheme and guidance booklet. * Guidance for parents, pupils and teachers on getting the best out of test practice and what is expected at Levels 3-5. Please note that the GaPS levels 3-5 title is 100% in line with both 2013 and 2014 tests and appears this year with a refreshed cover.

Becoming a Teacher provides a broad context for understanding education, addressing issues such as the influence of international policy and practice, education ideology and social justice. This is balanced with practical advice for the classroom on topics such as assessment for learning, learning technologies, literacy, numeracy and English as an additional language. Becoming a Teacher draws extensively on contemporary research and empirical evidence to support critical reflection about learning and teaching. Encouraging you to reflect on your knowledge and beliefs, it explores some of the complex social and cultural influences that influence professional learning and practice. The approach chimes with the government ' s recognition that trainee teachers should take a research-informed approach towards classroom practice. The fifth edition is refreshed and revitalized throughout, with: • a complete revision of each chapter • new chapters on 'Reforming ITE', 'Teachers Lives and Careers', 'International Influences', 'Engagement and Motivation', ' Learning and the Emotions', ' Data Usage in Schools', 'Safeguarding' and 'Learning with Digital Technologies' • up-to-date referencing of research findings • insightful policy analysis • critical commentary on issues For those training to teach in secondary school on a Postgraduate Certificate in Education (PGCE) or a School Direct programme, or taking an undergraduate or postgraduate Education Studies course, Becoming a Teacher provides invaluable support, insight and guidance. * With every new edition this book confirms its place as one of the most commanding, authoritative and influential texts in teacher education * Meg Maguire's leadership of this new editorial team means that this book remains my umbilical cord to those pivotal principals that I cherish in education: integrity, passion, critical engagement and transformation. * Gerry Czerniawski, Professor of Education, University of East London, UK * "An excellent contribution to the Teacher Education and development literature". * Many of the authors are leading thinkers in their field and as such the book offers a significant breadth, depth and coherence to the teacher development discourse. * Professor David Spendlove, School of Environment, Education and Development, The University of Manchester, UK

This book analyses and explains the role that the study of media texts has played in English curricula across the last 30 years, exploring the implications of these changes for teachers and students. Presenting a documentary analysis of the key evidence surrounding the history of media texts within English, the book focuses on how media has been characterized in the subject of English in the UK National Curriculum, while also reflecting on the position of media texts in other English-speaking National Curricula such as Australia and New Zealand. It dissects the changing role of media texts in English, considering media texts which range from newspapers and print adverts, films and TV through to digital, web-based and multimodal texts. The book charts the history of this part of English and considers what it can tell us about the nature of curriculum and English education more broadly. Speaking to important issues of curriculum in education, this book will be key reading for researchers, students and practitioners of media education, English education and the history of education.
