The standard work for all those involved in the field of clinical nutrition and dietetics, The Manual of Dietetic Practice has been equipping health care professionals with the essential foundations on which to build expertise and specialist skill since it was first published in 1988. The fourth edition responds to the changing demand for multidisciplinary, patient-centred, evidence-based practice and has been expanded to include dedicated chapters covering adult nutrition, freelance dietetics, complementary and alternative therapies. Compiled from the knowledge of both individual experts and the British Dietetic Association's Specialist Groups, this truly is the essential guide to the principles of dietetics across its whole range.

The standard work for all those involved in the field of clinical nutrition and dietetics, The Manual of Dietetic Practice has been equipping health care professionals with the essential foundations on which to build expertise and specialist skill since it was first published in 1988. The fourth edition responds to the changing demand for multidisciplinary, patient-centred, evidence-based practice and has been expanded to include dedicated chapters covering adult nutrition, freelance dietetics, complementary and alternative therapies. Compiled from the knowledge of both individual experts and the British Dietetic Association's Specialist Groups, this truly is the essential guide to the principles of dietetics across its whole range.

Since publication of its first edition, Manual of Dietetic Practice has remained an essential guide to the key principles of dietetics and a core text for healthcare professionals looking to develop their expertise and specialist skills. Published on behalf of the British Dietetic Association, the UK professional body for dietitians, it covers the entire dietetics curriculum and is also an ideal reference text for qualified practitioners. The book has been extensively restructured for its fifth edition and is now divided into two parts to make it easier to locate key topics. The first part covers professional practice, nutrition in specific groups, nutritional status and non-clinical areas of dietetic practice, while the second focuses on clinical dietetic practice, including nutrition support, and dietetic practice in individual areas of disease, from respiratory and renal disorder to mental health and palliative care. This edition also offers a companion website, www.manualofdieteticpractice.com, which includes case studies, discussion vignettes to place topics in a clinical context, downloadable copies of the appendices, key tables and figures, and references and useful links.

Nutrition and Diet Therapy: Self-Instructional Approaches covers the fundamentals of basic nutrition, and then nutrition as therapy, in both adults and children. It is designed to work as a traditional text or a self-instructional text that allows for distance-learning and self-paced instruction. Progress checks throughout each chapter and chapter post-tests help students to evaluate their comprehension of key information. The Fifth Edition has been completely revised and updated to include My Pyramid and corresponding DRIs and all of the all figures and tables have been revised. Accompanied by A Comprehensive Companion Web site

Multicultural Handbook of Food, Nutrition and Dietetics is the must have practical resource for dietitians, nutritionists and students working with both well settled but also recently migrated ethnic groups. Written by a team of authors drawn from the British Dietetic Association's Specialist Multicultural Nutrition Group the book provides in-depth information to equip the reader in the provision of nutrition advice to minority groups. Spanning a broad range of cultural groups the book seeks to consider religious and cultural requirements in relation to traditional diets; research on migration studies and chronic disease states; and nutrition and dietetic treatment in relation to key chronic diseases.

The new edition of this highly successful text brings it fully up to date with recent developments in surgical nursing, and includes a new chapter on perioperative stress and anxiety. The need for surgical nurses to remain at the cutting edge in relation to their knowledge and skills has never been greater, as the demands of higher patient throughput and reduced hospital stays take their toll. Nursing the Surgical Patient is written for, and by, nurses. It adopts a patient-centred approach to the care of people requiring a wide variety of surgical procedures. Compiled by experienced practitioners and educators in the field, it covers relevant anatomy and physiology, investigations, brief information on relevant medical conditions leading to surgery, an outline of the surgical procedures and the nursing care the patient will require. The key nursing care issues are described and explored, with case studies and care plans to bring theory to life. Comprehensive and research-based, yet accessible and engaging, Nursing the Surgical Patients a vital companion to nurses caring for surgical patients in either the primary or secondary care setting. This title is directed primarily towards health care professionals outside of the United States.

The authoritative guide for dietetic students and both new and experienced dietitians – endorsed by the British Dietetic Association Now in its sixth edition, the bestselling Manual of Dietetic Practice has been thoroughly revised and updated to include the most recent developments and research on the topic. Published on behalf of the British Dietetic Association, this comprehensive resource covers the entire dietetics curriculum, and is an ideal reference text for healthcare professionals to develop their expertise and specialist skills in the realm of dietetic practice. This important guide includes: The latest developments and scientific evidence in the field New data on nutrition and health surveillance programs Revised and updated evidence-based guidelines for dietetic practice An exploration of how Public Health England has influenced the field Practical advice on public health interventions and monitoring A companion website with helpful materials to support and develop learning Written for dietitians, clinical nutritionists, and other healthcare professionals by leading dietitians and other professionals, the Manual of Dietetic Practice continues to provide a crucial resource for experts and novices alike.

The Royal Marsden Manual of Clinical Nursing Procedures has been the number one choice for nurses since it first published, over 30 years ago. One of the world's most popular books on clinical skills and procedures, it provides detailed procedure guidelines based on the latest research findings and expert clinical advice, enabling nurses and students to deliver clinically effective patient-focused care. The ninth edition of this essential, definitive guide, written especially for pre-registration nursing students, now includes a range of new learning features throughout each chapter that have been designed to support student nurses to support learning in clinical practice. Providing essential information on over 200 procedures, this manual contains all the skills and changes in practice that reflect modern acute nursing care.

This book provides a comprehensive account of the relevant physiology, pathophysiology, nutritional therapy and dietetic application for each specialist dietetic area. All major specialist areas involved in the the treatment of adults are covered. The first section deals with clinical governance, for example patient-centred care, clinical decision-making and developing evidence-based practice. The second section on advanced clinical practice describes 18 clinical conditions or dietetic areas in detail. There is detailed coverage of 18 clinical conditions or dietetic areas: The control of food intake and absorption of nutrients Drug nutrient interactions Food allergy – allergy and intolerance Irritable bowel disease (IBD) and colorectal cancer Short bowel syndrome Enteral nutrition Parenteral
