This Excel lesson covers the heavy duty data analysis features of Excel: \* Goal Seek \* Scenario manager \* Solver These features let you tell Excel to run thousands of iterations to find the best answer, whether it be a specific number, the best result (maximum value) or the lower result (minimum value). I go through each feature step-by-step and include many images to make learning the material easy. No technical jargon, just plain English and a few corny jokes thrown in for good measure. As with all my lessons, there is a link inside where you can download follow-along workbooks to practice what you read.

using Microsoft Excel, enabling you to get better, more accurate results, faster. The new edition of this bestselling title begins by explaining basic modelling techniques before moving through to more complex models. The book is divided into two parts: the first part outlines model designs and gives templates, key features and techniques. The second part of the book shows how to build corporate financial models in Excel. This new edition includes a reworking of the book in Excel 2010 (but with older material still included), inclusion of Apple Mac, addition of specific 2010 features and end of chapter exercises. If you are buying the ebook, companion files can be downloaded from the digital downloads section of <http://www.financial-models.com/>.

Napier and Judd train students to become office professionals by bringing their experience as educators and corporate trainers to their latest text on Excel 97.

Fully updated and compliant with Excel 2013, this clearly explains the basic calculations for mathematical finance, backed up with simple templates for further use and development, and a workbook with exercises and solutions at the end of each chapter. The examples used are relevant to both managers and students in the UK and overseas. New to this edition  
Updated glossary of key terms  
Functions list in English and Euro languages  
Continuity check on all formats, layouts and charts  
More worked examples  
Additional exercises at the end of each chapter to help build models  
Templates and models available online.
