TRB's Airport Cooperative Research Program (ACRP) Report 25, Airport Passenger Terminal Planning and Design comprises a guidebook, spreadsheet models, and a user's guide in two volumes and a CD-ROM intended to provide guidance in planning and developing airport passenger terminals and to assist users in analyzing common issues related to airport terminal planning and design. Volume 1 of ACRP Report 25 explores the passenger terminal planning process and provides, in a single reference document, the important criteria and requirements needed to help address emerging trends and develop potential solutions for airport passenger terminals. Volume 1 addresses the airside, terminal building, and landside components of the terminal complex. Volume 2 of ACRP Report 25 consists of a CD-ROM containing 11 spreadsheet models, which include practical learning exercises and several airport-specific sample data sets to assist users in determining appropriate model inputs for their situations, and a user's guide to assist the user in the correct use of each model. The models on the CD-ROM include such aspects of terminal planning as design hour determination, gate demand, check-in and passenger and baggage screening, which require complex analyses to support planning decisions. The CD-ROM is also available for download from TRB's website as an ISO image.

A vital resource for pilots, instructors, and students, from the most trusted source of aeronautic information.

This comprehensive, best-selling reference provides the fundamental information you'll need to understand both the operation and proper application of all types of gas turbines. The full spectrum of hardware, as well as typical application scenarios are fully explored, along with operating parameters, controls, inlet treatments, inspection, troubleshooting, and more. The second edition adds a new chapter on gas turbine noise control, as well as an expanded section on use of inlet cooling for power augmentation and NOx control. The author has provided many helpful tips that will enable diagnosis of problems in their early stages and analysis of failures to prevent their recurrence. Also treated are the effects of the external environment on gas turbine operation and life, as well as the impact of the gas turbine on its surrounding environment.

In today ' s fast-changing business environment, those firms that want to remain competitive must also be innovative. Innovation is not simply about developing new technologies into new products or services, but in many cases, finding new models for doing business in the face of change. It often entails changing the rules of the game. Strategic Innovation demonstrates to students how to create and appropriate value using new game strategies to gain competitive advantage. The book begins with a summary of the major strategic frameworks and showing the origins of strategic innovation. Next, Atuah gives a thorough examination of contemporary strategy from an innovation standpoint, including: how to develop strategy in the face of change a detailed framework for assessing the profitability potential of a strategy or product consideration of how both for-profit and non-profit organizations can benefit from new game strategies. With a wealth of quantitative examples of successful strategies, as well as descriptive cases, Strategic Innovation will complement courses in strategy, and technology and innovation.

and other foreign aerospace firms are dependent on supplies from China, and the implications of all of these issues for U.S. security interests. The study should be of interest to business analysts, policymakers, lawmakers, and anyone who wishes to learn about China's market for commercial aviation, the capabilities of China's aerospace manufacturing industry, the role foreign aerospace firms are playing in the development of China's aerospace capabilities, and security implications for the United States. This research was sponsored by the U.S-China Economic and Security Review Commission, which was established by Congress in 2000 to monitor and report on the economic and national security dimensions of U.S. trade and economic ties with the People's Republic of China. This research was conducted within the International Security and Defense Policy Center of the RAND Corporation's National Security Research Division (NSRD).
