Minolta CLE—Manuals
The Minolta CLE has an electronic focal plane shutter to 1/1000, and a through-the-lens CdS exposure meter with aperture-priority automatic or manual exposure, and automated TTL flash exposure. None of these features would appear on any other body for M-mount lenses until the Konica Hexar RF of 1999 (which has all but the last).

Minolta camera instruction manuals, camera PDF manuals
The Leitz Minolta CLE (Compact LEICA Electronic) is a manual and automatic exposure, manual focus rangefinder camera that is an important part of the LEICA system. The CLE is the world's first LEICA M camera with TTL automatic exposure. The CLE is super lightweight: only 13.405 oz. (380.1g), or about 2/3 the weight of other Leicas.

Minolta CLE—Ken Rockwell
The film advance lever is incredibly smooth – smoother than my Ms – but it feels fragile in comparison. Nothing like a Minolta XK film camera which feels incredibly solid. The meter in the CLE turns off if you put it in manual mode! The M7 meters in auto and manual. I have no idea why Minolta designed it like this.

Why I Choose the Minolta CLE Over Any Leica M—Casual==
The Minolta CLE is a TTL-metering automatic exposure aperture-priority 35 mm rangefinder camera using Leica M lenses, introduced by Minolta in 1980. Leica and Minolta signed a technical cooperation agreement in June 1972.

Minolta CLE—Wikipedia
What are the functions on an affordable Minolta CLE camera? The functions performed by a Minolta CLE camera include: Timer: You can set the timer to take the photo at a specific number of seconds after the timer is set. Multiple photos: When the timer is set, you can trigger the camera to take multiple photos in succession.

Looking for Minolta CLE Service manual. Discussion in 'Leica and Rangefinders' started by sergio_sousa, Apr 24, 2008. sergio_sousa. I am looking desperately for a Minolta CLE service manual. It can be in paper, photocopy, digital, anything, but I need it to trouble shoot my CLE.

Looking for Minolta CLE Service manual | Photo.net==
The Minolta CLE had always intrigued me as a lighter body alternative to my heavier Leica M bodies, like the M3, M6, and M7, while still being compatible with my Leica M-mount lenses all in a compact package about the same size as my Fuji X100T, or 1970s era fixed lens rangefinder compacts like the Olympus 35RC. Minolta no longer services these cameras, and there are not many people who can.

Minolta CLE Review: The Most Zen of M-Mount Rigs—Steven==
The MINOLTA CLE is a 35mm rangefinder camera using Leica M lenses, which is originally the joint development of the Leitz Minolta CL. This camera has a compact body and the completely entire unique concept, although a lot of rangefinder cameras with the Leica M-mount were released in around 2000, including the BESSA R series.

The MINOLTA CLE—The Smart Rangefinder Camera Using Leica==
The Minolta CLE was introduced 1980. Yet, father Leitz makes haste very slowly. Until the introduction of the Leica M7 in 2001, the CLE remained for 21 years the most technologically advanced Leica M mount camera ever produced. Not bad, for a Minolta. Most CLE owners consider it one of the best cameras they have ever owned.

Leica Minolta CLE—CameraQuest
David Babsky says : July 11, 2017 at 8:47 am. Leica...or whatever the company was called by 2002... eventually got round (twenty-two years later) to offering the M7...which was what the Leitz/Minolta CLE had been twenty-two years before in 1980: a Leica-fit rangefinder with through-the-lens metered, automatically-set, camera-determined auto shutter speeds (and manual speeds, too) based on the ...

Minolta CLE | The Machine Planet
The Minolta CLE film rangefinder was introduced in 1980. Until Leica produced the Leica M7 in 2001, the CLE held the distinction of being the most technologically advanced Leica M mount camera that existed (a 21-year track record).. The CLE has been my secondary camera for the past four years. In this review, I include a bit of history on the Minolta CLE, as well as some of my experiences ...

Minolta CLE Review—Photo.net—Articles
Minolta has always been a bit of a dark horse, producing the outstanding and often overlooked Rokkor lenses. And this camera was designed to work specifically with them. Although the camera sports an M-mount, it is primarily designed for the 28mm, 40mm and 90mm Rokkor multicoated CLE lenses.

The Minolta CLE: The bastard son of Leica—Japan Camera==
Officially, Minolta referred to the CLE as " the world " s first rangefinder camera with interchangeable lenses and TTL automatic and manual exposure systems. " That ' s what it says in the first paragraph of the 46-page Owners Manual.
