Mitsubishi's 4G63t engine is among the most powerful engines ever in the sport-compact world. It's not uncommon to find one of these four-cylinder, iron-block, aluminum-headed, 2-liter turbocharged monsters making more than 1,000 horsepower with the right modifications and tuning - well above the 200-300 hp produced in the factory-made engines. Bolted into such cars as the Mitsubishi Lancer Evolution, Eclipse, and Galant, and the Eagle Talon and Plymouth Laser, the 4G63t has more than a cult following among sport-compact enthusiasts, who know and respect this engine's immense performance potential at the track or on the street. Up until now, in-depth performance information on the 4G63t has been hard to find. For this book, author Robert Bowen went straight to the source, Robert Garcia of Road/Race Engineering in Santa Fe Springs, California. RRE is the most well-known and respected Mitsubishi turbo performance shop in the United States, and Garcia is its in-house engine builder. Mitsubishi enthusiasts will benefit from Garcia's expertise and be able to build better, stronger engines than ever before. "How to Build Max-Performance Mitsubishi 4G63t Engines" covers every system and component of the engine, including the turbocharger system and engine management. More than just a collection of tips and tricks, this book includes a complete history of the engine and its evolution, an identification guide, and advice for choosing engine components and other parts. Profiles of

Associationism and the Literary Imagination traces the influence of empirical philosophy and associationist psychology on theories of literary creativity and on the experience of reading literature. It runs from David Hume's *Treatise of Human Nature* in 1739 to the works of major literary critics of the twentieth century, such as I.A. Richards, W.K. Wimsatt and Northrop Frye. Cairns Craig explores the ways in which associationist conceptions of literature gave rise to some of the key transformations in British writing between the romantic and modernist periods. In particular, he analyses the ways in which authors' conceptions of the form of their readers' aesthetic experience led to radical developments in literary style, from the fragmentary narrative of Sterne's *Tristram Shandy* in 1760 to Virginia Woolf's experiments in the rendering of characters' consciousness in the 1920s; and from Wordsworth's poetic use of autobiography to J.G. Frazer's exploration of a mythic unconscious in *The Golden Bough*. Detailed analyses are offered of the ways in which a wide variety of major British writers, including Scott, Lady Morgan, Dickens, Tennyson, Hardy, Yeats, Joyce and Woolf developed their literary techniques on the basis of associationist conceptions of the mind, and of how modern literary criticism - from Arthur

Symons to Roland Barthes - is founded on associationist principles. Associationism and the Literary Imagination relocates the traditions of British writing since the eighteenth century within the neglected context of its native empirical philosophy, and reveals how many of the issues assumed to be products of 'postmodern' or 'deconstructive' theory have long been foregrounded and debated within the traditions of British empiricism. This is a work which provides a radical new perspective on the history of literature in Britain and Ireland and challenges many of the assumptions of contemporary theoretical debate about the
