Importantly, these chapters highlight the controversies in the diagnostic, staging, and therapeutic management of patients with rectal cancer while providing practical management recommendations. This book is divided into 18 chapters. Early chapters address the diagnosis and staging of rectal cancer, highlighting the critical role of contemporary imaging in guiding treatment. The remaining chapters focus on the multimodality management of rectal cancer from the vantage points of surgery, pathology, chemotherapy, and radiation therapy. The major developments in surgery are reviewed first, including contemporary roles of local excision, total mesorectal excision, lateral pelvic lymph node dissection, organ preservation approaches, as well as the management of advanced,

using the leading, planning, organizing, and controlling approach. Management is a broad business discipline, and the Principles of Management course covers many management areas such as human resource management and strategic management, as well behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters.

unemployed financial manager from Texas, is a man down on his luck. With nothing left to lose except possibly a few years of his life, he takes a high-risk, high-reward job cleaning up at the Fukushima Daiichi Nuclear Power Plant. While in Japan, his luck drastically changes, and everything starts to go right for him. Unfortunately, his new-found luck seems to be coming at the expense of those around him. His investigation into this phenomenon puts him in the middle of a dangerous criminal conspiracy where he must contend with everything from the Yakuza to a sassy teenage girl with a penchant for role-playing.

Macquinet is thrilled to accompany her famous couturier Grandmere to Paris, there to create a silk trousseau for the Royal Princess Marguerite Valois. The Court is magnificent; its regent, Catherine de Medici, deceptively charming and the circumstances, darker than Rachelle could possibly imagine. At a time in history when the tortures of the Bastille and the fiery stake are an almost casual consequence in France, a scourge of recrimination is moving fast and furious against the Huguenots and as the Queen Mother's political intrigues weave a web of deception around her, Rachelle finds herself in imminent danger. Hope rests in warning the handsome Marquis Fabien de Vendome of the wicked plot against his kin. But to do so, Rachelle must follow a perilous course.

Industrial cluster policy is crucial to the development of regions in East Asia. Theories of agglomeration and clustering show that industrial clusters are effective ways of generating external economies and reducing transportation costs on a small and large-scale. Before a effective cluster can be built, however, it is necessary to clarify the conditions which are required for its success. This book presents a framework for analysing industrial cluster policies. The flowchart approach is a practical method which makes it clear what factors are important in building industrial clusters, how firms are agglomerated and how policy measures are prioritised. With case studies from China, USA, India, Japan, Thailand and Mexico, this book
