This volume constitutes the refereed proceedings of the 4th IFIP WG 11.2 International Workshop on Information Security Theory and Practices: Security and Privacy of Pervasive Systems and Smart Devices, WISTP 2010, held in Passau, Germany, in April 2010. The 20 revised full papers and 10 short papers were carefully reviewed and selected from 69 submissions. They are organized in topical sections on embedded security, protocols, highly constrained embedded systems, security, smart card security, algorithms, hardware implementations, embedded systems and anonymity/database security.

"I'd apologize for kissing you, but I'm not all that sorry." Dancer Melanie Brooks had escaped small-town Oklahoma, giving up the country for Broadway's bright lights. Yet after her mother's funeral called her back, her own health issues forced her to stay. Now her tenant, too-hot-for-his-own-good Adam Benson, is giving her a reason to dance again. But has a killer set his sights on her, too? Adam knows a little something about fresh starts. As for his beautiful neighbor, he doesn't see a wheelchair—he sees a woman who understands. But as the heat grows between them, he can't avoid the feeling that more than her big-city past haunts her—and that danger has been lurking, waiting to strike....

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs

Magic, cunning, and one very special cat join forces in this hilarious, extraordinary tale by the author of the Dairy Queen trilogy and Princess Ben. Princess Wisdom, known as Dizzy, longs for a life of adventure beyond the staid old kingdom of Montagne. Tips, a soldier, longs to keep his true identity a secret. Fortitude, an orphaned maid, longs only for Tips. These three souls might possibly attain their dreams while preserving their empire from ruin — if only they can bear one another's company long enough to come up with a plan.

Renowned economist and author of Big Business Tyler Cowen brings a groundbreaking analysis of capitalism, the job market, and the growing gap between the one percent and minimum wage workers in this follow-up to the New York Times bestseller The Great Stagnation. The United States continues to mint more millionaires and billionaires than any country ever. Yet, since the great recession, three quarters of the jobs created here pay only marginally more than minimum wage. Why is there growth only at the top and the bottom? Economist and bestselling author Tyler Cowen explains that high earners are taking ever more advantage of machine intelligence and achieving ever-better results. Meanwhile,

nearly every business sector relies less and less on manual labor, and that means a steady, secure life somewhere in the middle—average—is over. In *Average is Over*, Cowen lays out how the new economy works and identifies what workers and entrepreneurs young and old must do to thrive in this radically new economic landscape.
