makes them accessible to students and easier to understand. Introduce students to the solar system. Explain how it is made up of planets, moons and asteroids. Then, travel to each of the inner and outer planets. Build a scale model of the solar system, and plan your trip to one of its planets. Your next stop, the moon. Learn the different phases of the moon and figure out what a Blue Moon is. Take a look at the stars and compare yellow dwarfs with blue giants. Create a presentation detailing the story behind your favorite constellation. Finally, compare asteroids, meteors and comets as they travel through our solar system. Aligned to the Next Generation State Standards and written to Bloom's Taxonomy and STEAM initiatives, additional hands-on experiments, crossword, word search, comprehension quiz and answer key are also included.

Where am I in the solar system? A beloved bestseller, now refreshed with new art from Christine Gore, that will help children discover their place in the Milky Way.

Where is the earth? Where is the sun? Where are the stars? Now with new art by Christine Gore, here is an out-of-this world introduction to the universe for children.

With Earth as a starting point, a young astronaut leads readers on a tour past each planet and on to the stars, answering simple questions about our solar system. In clear language, drawings, and diagrams, space unfolds before a child's eyes. Colorful illustrations, filled with fun detail, give children a lot to look for on every page, and a glossary helps reinforce new words and concepts. A terrific teaching tool, *Me and My Place in Space* is an easy and enjoyable way to introduce the concept of space to budding astronomers.
