Take a wrench and an 18 mm A/F socket. Turn the crankshaft pulley. Align the camshafts roughly to set a timing mark at the bottom. Note: if you have missed the timing mark, do not turn the shaft anti-clockwise. Just make two more turns forward for proper positioning of the shaft. Remove shields under the engine, if there are any.

How to replace a timing belt on a Peugeot/Citroën 1.4 16v ...

There are no timing marks on these engines Im afraid- the belt has to be set up with the engine locked into position using engine locking / timing tools - I will give you a pic to show you how this is done - where the timing lock pins go which will help you - You should use the proper pins otherwise the timng will not be spot on.

Do-it-yourself mechanics are provided with profusely illustrated information on how a car's systems work, how to find defective parts, and how to repair or replace those parts or perform simple maintenance checks

"This textbook covers all the theory and technology sections that students need to learn in order to pass level 1, 2 and 3 automotive courses from the Institute of Motor Industry, City & Guilds and other exam boards. It has been produced in partnership with ATT Training and is a companion to their online learning resources. Learning is made more enjoyable and effective as the topics in the book are supported with online activities, video footage, assessments and further reading. If you are using ATT Training materials then this is the ideal textbook for your course"--

This is one in a series of manuals for car or motorcycle owners. Each book provides information on routine maintenance and servicing, with tasks described and photographed in a step-by-step sequence so that even a novice can do the work.
