The first translation of a previously unknown Aztec codex and its initiatory teachings for 2012 • Discloses the potential for great spiritual awakening offered at the end of the Aztec calendar cycle • Presents the only existing English-language transcription of the Aztec codex, with line-by-line commentary • Contains the epic poetry and metaphysical insights of Beat poet Marty Matz (1934-2001 In 1961 an unknown Aztec codex was revealed to Beat poet and explorer Marty Matz by a Mazatec shaman in the mountains of Oaxaca, Mexico. Originally intended for dramatic performance, this codex presents a profound metaphysical teaching describing how the end of time will bring about a visionary ascent. At the behest of his Mazatec teacher, Matz transcribed this pictorial codex into a literary form that would preserve its initiatory teachings and reveal its secret meanings to a wider audience.Pyramid of Fire is an epic poem that provides a vehicle to transport the initiate into the higher realms of consciousness. It represents a barely surviving thread of teachings that have been passed down in secret since the time of the Spanish Conquest. Revealed are the techniques by which man is transported to the stellar realm after death via the solar energy within what the ancients called the "serpent of consciousness." Line-by-line commentary by Matz and John Major Jenkins provides insights into the perennial philosophy contained in the codex and its relevance to our times.

A radical reinterpretation of the Pyramid Texts as shamanic mystical wisdom rather than funerary rituals • Reveals the mystical nature of Egyptian civilization denied by orthodox Egyptologists • Examines the similarity between the pharaoh's afterlife voyage and shamanic journeying • Shows shamanism to be the foundation of the Egyptian mystical tradition To the Greek philosophers and other peoples of the ancient world, Egypt was regarded as the home of a profound mystical wisdom. While there are many today who still share that view, the consensus of most Egyptologists is that no evidence exists that Egypt possessed any mystical tradition whatsoever. Jeremy Naydler's radical reinterpretation of the Pyramid Texts--the earliest body of religious literature to have survived from ancient Egypt--places these documents into the ritual context in which they belong. Until now, the Pyramid Texts have been viewed primarily as royal funerary texts that were used in the liturgy of the dead pharaoh or to aid him in his afterlife journey. This emphasis on funerary interpretation has served only to externalize what were actually experiences of the living, not the dead, king. In order to understand the character and significance of the extreme psychological states the pharaoh experienced--states often involving perilous encounters with alternate realities--we need to approach them as spiritual and religious phenomena that reveal the extraordinary possibilities of human consciousness. It is the shamanic spiritual tradition, argues Naydler, that is the undercurrent of the Pyramid Texts and that holds the key to understanding both the true nature of these experiences and the basis of ancient Egyptian mysticism.

A unique look at how classical notions of ascent and flight preoccupied early modern British writers and artists Between the late sixteenth century and early nineteenth century, the British imagination-poetic, political, intellectual, spiritual and religious--displayed a pronounced fascination with images of ascent and flight to the heavens. Celestial Aspirations explores how British literature and art during that period exploited classical representations of these soaring themes--through philosophical, scientific and poetic flights of the mind; the ascension of the disembodied soul; and the celestial glorification of the ruler. From textual reachings for the heavens in Spenser, Marlowe, Shakespeare, Donne and Cowley, to the ceiling paintings of Rubens, Verrio and Thornhill, Philip Hardie focuses on the ways that the history, ideologies and aesthetics of the postclassical world received and transformed the ideas of antiquity. In England, narratives of ascent appear on the grandest scale in Milton's Paradise Lost, an epic built around a Christian plot of falling and rising, and one of the most intensely classicizing works of English poetry. Examining the reception of flight up to the Romanticism of Wordsworth and Tennyson, Hardie considers the Whig sublime, as well as the works of Alexander Pope and Edward Young. Throughout, he looks at motivations both public and private for aspiring to the heavens--as a reward for political and military achievement on the one hand, and as a goal of individual intellectual and spiritual exertion on the other. Celestial Aspirations offers an intriguing look at how creative minds reworked ancient visions of time and space in the early modern era.

Leonardo Da Vinci's Elements of the Science of Man describes how Da Vinci integrates his mechanical observations and experiments in mechanics into underlying principles. This book is composed of 17 chapters that highlight the principles underlying Da Vinci's research in anatomical studies. Considerable chapters deal with Leonardo's scientific methods and the mathematics of his pyramidal law, as well as his observations on the human and animal movements. Other chapters describe the artist's anatomical approach to the mechanism of the human body, specifically the physiology of vision, voice, music, senses, soul, and the nervous system. The remaining chapters examine the mechanism of the bones, joints, respiration, heart, digestion, and urinary and reproductive systems.

"What is immortality? Does it mean living forever in the same physical body? The Path to Immortality shows that immortality means total liberation from the duality of this world and absolute freedom through spiritual mastery and higher consciousness. Immortality, it shows, is your divine right and the destiny of your soul. This far-reaching work unfolds metaphysical truths about the law of cycles and the seven "bodies" of man, the planes of consciousness, the inner working of the chakras and the flow of energy through them. It also explores what the soul is and how we can take care of it, the meaning of the "fiery trial," dangers that confront the soul on the homeward path and tools to deal with them."

With his earlier two series in Egyptology, Gerald Massey turned existing doctrine on its head to argue that not only had Egypt spawned human civilization, but that Egyptian mythology was the basis for Jewish and Christian beliefs. The culmination of his years at this particular intellectual pursuit, Ancient Egypt: The Light of the World is Massey's crown jewel. In this, the most philosophical (in both tone and concept) of his Egyptological works, Massey, ever the intrepid escort, leads a tour through thousands of years of sociological, cultural, and spiritual development, all the while pointing, with dazzling reason and persuasive prose, to a distant, common, Egyptian origin. British author GERALD MASSEY (1828-1907) published works of poetry, spiritualism, Shakespearean criticism, and theology, but his best-known works are in the realm of Egyptology, including A Book of the Beginnings and The Natural Genesis.
