The RACGP produces a wide range of clinical guidelines to assist GPs in their work. In addition to the RACGP guidelines below, the RACGP also recognises external produced guidelines through Endorsement and recognition as an Accepted Clinical Resource.

RACGP – Clinical guidelines

The RACGP has published the Guidelines for preventive activities in general practice 9th edition (Red Book) since 1989 to support evidence-based preventive activities in primary care. The Red Book is now widely accepted as the main guide to the provision of preventive care in Australian general practice.

RACGP – Guidelines for general practice

Sadly, many of our colleagues are not up to date with their guidelines and fall behind in evidence-based medicine. On average, it takes 16 years for emerging research data to make it into practice. Further, as soon as the guidelines are released, they are already outdated. The 2020 RACGP Diabetes Management Guideline is no exception.

New RACGP Diabetes Management Guidelines – what's new ...

These guidelines give up-to-date, evidence-based information tailored for general practice to support general practitioners (GPs) and their teams in providing high-quality management. In developing the 2020 edition of Management of type 2 diabetes: A handbook for general practice , The Royal Australian College of General Practitioners (RACGP) has focused on factors relevant to current Australian clinical practice.

RACGP – Introduction

The new guidelines contain additional information about testimonials and social media, acceptable evidence practitioners can use to support claims made in advertising, and protected titles and claims made about qualifications, competence and registration. Karen Stephens, a risk adviser for medical defence organisation MDA National, told newsGP the majority of changes are found in section four ...

RACGP – Revised advertising guidelines GPs need to know

The Royal Australian College of General Practitioners (RACGP) first developed Guidelines for the non-surgical management of hip and knee osteoarthritis in 2009. Since then, there has been substantial progress in evaluating the effectiveness and safety of commonly used and new therapies for osteoarthritis (OA). The objective of this new

RACGP offers new suite of IUD resources. It is hoped the resources will encourage the more widespread adoption of IUDs as a contraception method in Australia. The resources are the first of their kind in Australia to provide a systematic checklist for IUD inserters. The newly released suite consists of five intrauterine device (IUD) resources, including a checklist and patient confirmation form, patient pre- and post-insertion checklist, practitioner checklist and disclaimer.
