"There's something in the air, but it isn't love." Apocalyptic forces both real and imaginary loom large in this sprawling philosophical novel set in 2012 New York City. Ray, an Ivy League grad and struggling fledgling journalist, is a few weeks into trying to make ends meet as a bicycle courier when he mounts an investigation to solve the mystery of his own death. Along the way, he strikes up a strange romance with Haruka— a 19-year-old seeking self-empowerment through a malevolent form of online dating— and finds himself taken under the wing of an exalted, aging academic, Emerson, whose Virgil-like guidance might not be all that it seems. Equal parts zany existential detective story, scathing Web 2.0 sendup, and poignant elegy for what was lost in the smartphone revolution, In Limbo asks critical psychological and spiritual questions about what it means to be alive— and human— in the 21st century.

Although the precepts of software engineering have been around for decades, the field has failed to keep pace with rapid advancements in computer hardware and software. Modern systems that integrate multiple platforms and architectures, along with the collaborative nature of users who expect an instantaneous global reach via the Internet, require updated software engineering methods. Social Software Engineering: Development and Collaboration with Social Networking examines the field through the spectrum of the social activities that now compose it. Supplying an up-to-date look at this ever-evolving field, it provides comprehensive coverage that includes security, legal, and privacy issues in addition to workflow and people issues. Jessica Keyes, former managing director of R&D for the New York Stock Exchange and noted columnist, correspondent, and author with more than 200 articles published, details the methodology needed to bring mission-critical software projects to successful conclusions. She provides readers with the understanding and tools required to fuse psychology, sociology, mathematics, and the principles of knowledge engineering to develop infrastructures capable of supporting the collaborative applications that today ' s users require.

A noted journalist chronicles three years in the lives of a team of maverick software developers, led by Lotus 1-2-3 creator Mitch Kapor, intent on creating a revolutionary personal information manager to challenge Microsoft Outlook. Reprint. 30,000 first printing.
