Since the bursting of Japan's bubble economy, from 1990 onwards, its multinational companies (MNCs) have faced new competitive challenges, and questions about the management practices on which they had built their initial success in global markets. Japanese engagement in the international economy has undergone a number of phases. Historically, Japanese MNCs learnt from foreign companies, frequently through strategic alliances. After the post-war 'economic miracle', Japanese manufacturers in particular converted themselves into MNCs, transferred their home-grown capabilities to overseas subsidiaries, and made an impact on the world economy. But the period after 1990 marked declining Japanese competitiveness, and asked questions about the ability of Japanese MNCs to be more responsive and global in their strategies, organization, and capabilities. It has been argued that the established management practices of Japanese MNCs inhibited adaptation to recent demands of global competition. This volume presents new case evidence on how Japanese MNCs have responded to the new challenges of the global market place, and it provides examples of how they have transformed strategies and competitive capabilities. This book was originally published as a special issue of Asia Pacific Business Review.

A local Singaporean magazine dedicated to photography and videography.

Global notebook PC market has been challenged since 2012, and the prevalence of smart handheld devices continues to put a dent in the notebook PC market in 2015. Meanwhile, after four years of rapid growth, development of the worldwide tablet market slowed down in 2014, with mature markets of the United States and Western Europe reaching a saturation point. By contrast, LCD TV shipments managed to grow slightly in 2014, thanks to the 2014 FIFA World Cup. This book presents an overview of component supply chains of notebook PC, tablet, LCD TV and LCD TV panel, examines product development trends, and analyzes the strategies of branded vendors as well as contract makers.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Offering a bird's eye view of foreign investments in Latin America, this volume informs us of how the economic and social environment affects management in Latin American subsidiaries and regional markets. It also presents Japan Multinational Enterprises Study Group (JMNESG) led by Dr. Abo, who visited 5 Japanese companies in Argentina, 15 in Brazil and 10 in Mexico. Exploring 30 companies in detail, the scores are analyzed by a hybrid theory of application and adaptation established by JMNESG. The companies JMNESG visited are located mainly in Argentina, Brazil, and Mexico, but also in Chile and Venezuela, and include: Toyota, Nissan, Honda, Toshiba, and Panasonic. The authors discuss and explore the unique characteristics of Japanese management in Latin America in comparison with world-wide application scores and offer a summary of free trade zones.

Provides lists of selling prices of items found on eBay in such categories as antiques, boats, books, cameras, coins, collectibles, dolls, DVDs, real estate, stamps, tickets, and video games.
