The document generation wizard lets you save the defined parameter set. First, you enter and save numerous parameters for base and target documents. Based on these definitions, you can select consolidation methods and choose a list of relevant business partners. Once you save the defined parameter set, you can run the wizard periodically according to your company 's business practices.

AWS Launch Wizard for SAP is a service that guides you through the sizing, configuration, and deployment of SAP applications on AWS, and follows AWS cloud application best practices . AWS Launch Wizard reduces the time it takes to deploy SAP applications on AWS. You input your application requirements, including SAP HANA settings, SAP landscape settings, and deployment details on the service console, and Launch Wizard identifies the AWS resources to deploy and run your SAP application.
