Circuits is an extensive revision of the classic text by Sedra and Smith. The primary objective of this textbook remains the development of the student's ability to analyse and design electronic circuits.

Thoroughly revised to make it more accessible, trimmer, and easier to use, this manual features strong use of computational tools and offers simple, fundamental knowledge experiments. It complements Microelectronic Circuits, 4/E by allowing students to "learn-by-doing" and to explore the realm of real-world engineering based on the material from the main text. The equipment necessary to undertake the experiments is consciously kept at a minimum in order to take into account
