Standard Website Resolution 2012 - orrisrestaurant.com

There's no standard resolution for web design that is best for all cases since websites need to consider how their audience is using the site and what their design concept is. But to give you a quick answer, the most common design file resolution used by the digital agencies that we work with is 1440px wide, with the main content container that is 1140px.

Recommended Screen Resolution for Web Design

There's no one best screen size to design for. Websites should transform responsively and fast at all screen resolutions on different browsers and platforms. Accessible. Mobile-friendly. Design for your audience, first. Design from 360×640 through 1920×1080. Design for desktop displays from 1024×768 through 1920×1080.

What Are The Best Screen Sizes For Responsive Web Design?

If you've been around computers and digital images for a while, especially if you're a web designer or a photographer publishing your photos online, you've no doubt heard it said that the correct resolution for images displayed on the web, or on computer screens in general, is 72 pixels per inch (ppi). You may have even heard it said that while 72 ppi is correct for images displayed on a Mac, a Windows-based PC needs the resolution set to 96 ppi.

The 72 PPI Web And Screen Resolution Myth

W3Schools' statistics may not be relevant to your web site. Different sites attract different audiences. Some web sites attract developers using professional hardware, while other sites attract hobbyists using older computers. Anyway, data collected from W3Schools' log-files over many years clearly shows the long term trends.
