The Difference Engine: A Novel: Gibson, William, Sterling

A difference engine, first created by Charles Babbage, is an automatic mechanical calculator designed to tabulate polynomial functions. Its name is derived from the method of divided differences, a way to interpolate or tabulate functions by using a small set of polynomial co-efficients. Most mathematical functions commonly used by engineers, scientists and navigators, including logarithmic and trigonometric functions, can be approximated by polynomials, so a difference engine can compute many u

The computer age has arrived a century ahead of time with Charles Babbage's perfection of his Analytical Engine. The Industrial Revolution, supercharged by the development of steam-driven cybernetic Engines, is in full and drastic swing. Great Britain, with her calculating-cannons, steam dreamoughts, machine-guns and information technology, prepares to better the world's lot . . .

Science fiction novel set in an alternate Victorian England, where the Information Age has dawned a century early. Sybil Gerrard sees kinotrope pictures of a very different America - but does her future lie with the suave, but sinister, Mr. Radley, or Texan, Sam Houston, who could be a spy or conman, or both?.

A collection of nonfiction writings includes essays discussing the Singapore trial of a drug trafficker, what's wrong with the Internet, and how music documents modern culture.

William Gibson is frequently described as one of the most influential writers of the past few decades, yet his body of work has only been studied partially and without full recognition of its implications for literature and culture beyond science fiction. It is high time for a book that explores the significance and wide-ranging impact of Gibson’s fiction. In the 1970s and 80s, Gibson, the “Godfather of Cyberpunk,” rejuvenated science fiction. In groundbreaking works such as Neuromancer, which changed science fiction as we knew it, Gibson provided us with a language and imaginary through which it became possible to make sense of the newly emerging world of globalization and the digital and media age. Ever since, Gibson’s reformulation of science fiction has provided us not just with radically innovative visions of the future but indeed with trenchant analyses of our historical present and of the emergence and exhaustion of possible futures. NEW YORK TIMES bestseller • 2005: Welcome to NoCal and SoCal, the uneasy sister-states of what used to be California. The millennium has come and gone, leaving in its wake only stunned survivors. In Los Angeles, Berry Rydell is a former armed-response rentacop now working for a bounty hunter. Chevette Washington is a bicycle messenger turned pickpocket who impulsively snatches a pair of innocent-looking sunglasses. But these are no ordinary shades. What you can see through these high-tech specs can make you rich—or get you killed. Now Berry and Chevette are on the run, zeroing in on the digitalized heart of DatAmerica, where pure information is the greatest high. And a mind can be a terrible thing to crash. . . . Praise for Virtual Light “Both exhilarating and terrifying . . . Although considered the master of ‘cyberpunk’ science fiction, William Gibson is also one fine suspense writer.”—People “A stunner . . . A terrifically stylish burst of kick-butt imagination.”—Entertainment Weekly “Convincing . . . frightening . . . Virtual Light is written with a sense of craft, a sense of humor and a sense of the ultimate seriousness of the problems it explores.”—Chicago Tribune “In the emerging pop culture of the information age, Gibson is the brightest star.”—The San Diego Union-Tribune

A portrait of early nineteenth-century mathematician Charles Babbage describes his efforts to construct the first computing machine more than one century before the invention of the modern computer. Reprint.

“The best novel William Gibson has ever written about the world we’re entering daily. Neuromancer made Gibson famous; Idroru cements that fame.”—The Washington Post Book World 21st century Tokyo, after the millennial quake. Neon rain. Light everywhere blowing under any door you might try to close. Where the New Buildings, the largest in the world, erect themselves unaided, their slow rippling movements like the contractions of a sea-creature... Colin Laney is here looking for work. He is an intuitive fisher for patterns of information, the “signature” an individual creates simply by going about the business of living. But Laney knows how to sift for the dangerous bits. Which makes him useful—to certain people. Chia McKenzie is here on a rescue mission. She’s fourteen. Her idol is the singer Rez, of the band Lo/Rez. When the Seattle chapter of the Lo/Rez fan club decided that he might be in trouble in Tokyo, they sent Chia to check it out. Rei Toei is the idoru—the beautiful, entirely virtual media star adored by all Japan. Rez has declared that he will marry her. This is the rumor that has brought Chia to Tokyo. True or not, the idoru and the powerful interests surrounding her are enough to put all their lives in danger...
