Permaculture gardening means "permanent agriculture" and it is defined as working with natural forces—the wind, the sun, and water—to provide food, shelter, water, and everything else your garden needs besides plants and seeds. And the best part is that it's all done with the least amount of labor and without destroying the land.

Starting Your Own Permaculture Garden—The Spruce

In a permaculture garden plants are grouped into seven distinct ' layers '. The canopy is the tallest layer, and usually consists of tall trees. The understorey includes smaller trees and large shrubs, followed by the shrub layer, which can include fruit bushes such as blueberries and gooseberries. Tall trees are not usually an option in small gardens, but the understorey or shrub layer can effectively be used as the canopy where space is tight.
