Excel VBA and AutoCAD Mechanical - Autodesk Community Using VBA in Microsoft Excel for Data Analysis Automation. Visual Basic for Applications (VBA) may be used to automate virtually anything in any Microsoft Office (MS Office) product.

~~Using Excel Vba In Mechanical Engineering~~

Objects: Excel is object-oriented, which means everything is an object - the Excel window, the workbook, a sheet, a chart, a cell. VBA allows users to manipulate and perform actions with objects in Excel. If you don't have any experience with object-oriented programming and this is a brand new concept, take a second to let that sink in!

~~Excel VBA Tutorial | How to Write Code in a Spreadsheet~~

Wondering where the VBA code goes in your Excel workbook? Excel has a VBA backend called the VBA editor. You need to copy and paste the code into the VB Editor module code window. Here are the steps to do this: Go to the Developer tab. Click on the Visual Basic option. This will open the VB editor in the backend.

~~Working with Worksheets using Excel VBA (Explained with ...)~~

In a worksheet cell, you would enter a formula such as =MATCH (9,A1:A10,0). However, in a Visual Basic procedure, you would specify a Range object to get the same result. VB. Sub FindFirst () myVar = Application.WorksheetFunction \_ .Match (9, Worksheets (1).Range ("A1:A10"), 0) MsgBox myVar End Sub.

~~Using Excel worksheet functions in Visual Basic~~

To use a variable in VBA, must tell VBA which type of object the variable represents by using the Dim statement. You then set its value and use it to set other variables or properties. Dim MyStringVariable As String MyStringVariable = "Wow!" Worksheets(1).Range("A1").Value = MyStringVariable Branching and looping
