Rethinking How to Build Inclusive Organizations Race, Work, and Leadership is a rare and important compilation of essays that examines how race matters in people's experience of work and leadership. What does it mean to be black in corporate America today? How are racial dynamics in organizations changing? How do we build inclusive organizations? Inspired by and developed in conjunction with the research and programming for Harvard Business School's commemoration of the fiftieth anniversary of the founding of the HBS African American Student Union, this groundbreaking book shines new light on these and other timely questions and illuminates the present-day dynamics of race in the workplace. Contributions from top scholars, researchers, and practitioners in leadership, organizational behavior, psychology, sociology, and education test the relevance of long-held assumptions and reconsider the research approaches and interventions needed to understand and advance African Americans in work settings and leadership roles. At a time when--following a peak in 2002--there are fewer African American men and women in corporate leadership roles, Race, Work, and Leadership will stimulate new scholarship and dialogue on the organizational and leadership challenges of African Americans and become the indispensable reference for anyone committed to understanding, studying, and acting on the challenges facing leaders who are building inclusive organizations.

This no-nonsense guide to social intelligence for project managers gives you a step-by-step process for building a bulletproof project team—no matter what gaps exist in personality, geography, culture, or communication style. High-performing teams don't happen by magic. You need processes that are designed in a socially intelligent way if your team is going to overcome the modern world's tough challenges with coordination. To be a star project manager, you have to communicate with people in their individual learning styles, provide accountability in ways that won't be demotivating, and run meetings and minutes that people won't tune out. Your processes must be constructed in ways that respect the complex realities of social dynamics step by step. You have to know your team before you can motivate them, and you have to motivate them before you can manage them. In this book are foolproof techniques to make sure your team connects with you, each other, and everyone they need to get the job done. After all, a team should be more than the sum of its parts—and it's up to the project manager to provide the glue that holds it all together.
