The Walther PP (Polizeipistole, or police pistol) ... Designed as a police service pistol, it was a blowback operated, double-action pistol with an external slide-stop lever and a firing-pin safety. A manual decocker lever was on the left side of the slide; when pushed down, it locked the firing pin and released the hammer. When the 9×19mm Parabellum was chosen as the standard service round ...

The Walther PP (police pistol) series pistols are blowback-operated semi-automatic pistols. They feature an exposed hammer, a traditional double-action trigger mechanism, a single-column magazine, and a fixed barrel which also acts as the guide rod for the recoil spring. The series includes the Walther PP, PPK, PPK/S, and PPK/E.

The Development of the German Air Force, 1919 to 1939, first published in 1968, written by Professor Richard Suchenwirth, and revised and edited by Mr. Harry R. Fletcher, is one of a series of historical studies written for the United States Air Force Historical Division by men who had been key officers in or outstanding authorities on the German Air

Force during World War II. The overall purpose of the series is twofold: 1) To provide the United States Air Force with a comprehensive and, insofar as possible, authoritative history of a major air force which suffered defeat in World War II, a history prepared by many of the principal and responsible leaders of that air force; 2) to provide a firsthand account of that air force's unique combat in a major war, especially its fight against the forces of the Soviet Union. This series of studies therefore covers in large part virtually all phases of the Luftwaffe's operations and organization, from its camouflaged origin in the Reichswehr, during the period of secret rearmament following World War I, through its participation in the Spanish Civil War and its massive operations and final defeat in World War II, with particular attention to the air war on the Eastern Front.

This publication reviews the results of research on the western pine beetle up to July 1, 1952. It shows the progress that has been made in over a half-century of study of this one bark beetle. It also records the trials and errors--the research that ran into blind alleys. The record of this pioneer effort in the field of forest entomology in the United States should be of great help to research workers who are faced with similar problems.

Now available as single volumes as well as in a 13-volume set, the rare proceedings collected here were originally published between 1920 and 1958. This set documents international activity in applied psychology between the wars and during the post-War reestablishment of international scientific collaboration. The proceedings of each Congress are reproduced with a short individual preface discussing their content and import.
