Coconut water is a refreshing beverage that comes from coconuts. It is a powerhouse of nutrition containing a complex blend of vitamins, minerals, amino acids, antioxidants, enzymes, health enhancing growth hormones, and other phytonutrients. Because its electrolyte content is similar to human plasma, it has gained international acclaim as a natural sports drink for oral rehydration. As such, it has proven superior to commercial sports drinks. Unlike other beverages, it is completely compatible with the human body, in so much that it can be infused directly into the bloodstream. Nichols revolutionizes how we think about these questions, revealing the remarkable truth about the benefits of being in, on, under, or simply near water. Combining cutting-edge neuroscience with compelling personal stories from top athletes, leading scientists, military veterans, and gifted artists, he shows how proximity to water can improve performance, increase calm, diminish anxiety, and increase professional success. than originally believed. Water is incredibly sensitive to the micro-information from the surrounding environment and it also possesses a memory. Unfortunately, many of the modern techniques for making water readily available have resulted in depreciating its vitality. Many of the benefits that water can provide when in its optimum natural state have been lost. But there are now methods that have been perfected over the past several decades that can transform our banal tap water back to its natural potent state as the elixir of life. Experience has shown that these methods and devices can even transform water that has been heavily polluted by agriculture or industry into a potable fluid that looks like the product of a limpid mountain spring. Tests show that no trace of the pollutants remain. Many of these devices are available commercially, offering to all the possibility of enjoying the optimum benefits water can deliver when in its healthy, natural state.

Why do so many of us feel drawn to water? Researchers around the globe are increasingly intrigued by our psychological response to blue space: oceans, rivers, lakes, canals and waterfalls. Research is showing that they are good for us, inducing a positive mood and reducing negative feelings. Many people naturally gravitate towards the nearest blue space for their regular walks. There is an innate soothing quality that water brings, whether it 's crashing waves, the gentle lapping beat of the water 's edge or the reflections we see... Water brings on a meditative, 'blue mind' state. Dr Catherine Kelly uses the study of Blue Mind, a term coined by Dr Wallace Nichols, which explores the study of water and why it makes us happy, to explore and

understand the importance of blue space (water environments) and their therapeutic benefits. Looking at the most up-to-date research and evidence that supports its importance for our wellbeing, she suggests how we can all integrate blue mind practices into our lives, providing examples and exercises that anyone can use to enhance their mental health.

This book will transform your world view. Dr. Masaru Emoto ' s first book, The Hidden Message in Water, told about his discovery that crystals formed in frozen water revealed changes when specific, concentrated thoughts were directed toward them. He also found that water from clear springs and water that has been exposed to loving words showed brilliant, complex and colourful snowflake patterns. In contrast, polluted water, or water exposed to negative thoughts formed incomplete, asymmetrical patterns with dull colors. Thee Healing Power of Water includes contributions from leading scientists such as William A. Tiller, who was featured in the film What the Bleep Do We Know!?!; and from spiritual teachers such as Doreen Virtue, Starhawk, William Bloom, and Sig Lonegren.
