A smart and funny book by a prominent Harvard psychologist, which uses groundbreaking research and (often hilarious) anecdotes to show us why we 're so lousy at predicting what will make us happy – and what we can do about it. Most of us spend our lives steering ourselves toward the best of all possible futures, only to find that tomorrow rarely turns out as we had expected. Why? As Harvard psychologist Daniel Gilbert explains, when people try to imagine what the future will hold, they make some basic and consistent mistakes. Just as memory plays tricks on us when we try to look backward in time, so does imagination play tricks when we try to look forward. Using cutting-edge research, much of it original, Gilbert shakes, cajoles, persuades, tricks and jokes us into accepting the fact that happiness is not really what or where we thought it was. Among the unexpected questions he poses: Why are conjoined twins no less happy than the general population? When you go out to eat, is it better to order your favourite

dish every time, or to try something new? If Ingrid Bergman hadn't gotten on the plane at the end of Casablanca, would she and Bogey have been better off? Smart, witty, accessible and laugh-out-loud funny, *Stumbling on Happiness* brilliantly describes all that science has to tell us about the uniquely human ability to envision the future, and how likely we are to enjoy it when we get there.

"A 22-volume, highly illustrated, A-Z general encyclopedia for all ages, featuring sections on how to use World Book, other research aids, pronunciation key, a student guide to better writing, speaking, and research skills, and comprehensive index"--

Haunting and atmospheric, this debut novel portrays the heartbreak, hardship and moments of surprising grace in the life of a man struggling to realize his destiny. A young man of astonishing promise when he emigrated from Ghana in 1955, Samuel Tyne was determined to accomplish great things. Fifteen long years later, he's an insignificant government employee who hates his job when he unexpectedly inherits his uncle's crumbling mansion in Aster, Alberta. Despite his wife's resistance and the sullen complaints of his thirteen-year-old twin daughters, Samuel quits his job and moves his family to the town. For here, he believes, is that fabled second chance, and he is determined not to fail again. At first, Aster seems perfect — to Samuel, the formerly all-black town represents the return to a communal, idyllic way of life. But he soon discovers the town's problems: a history of in-fighting, a strict town council and a series of mysterious fires that put all the townsfolk on edge. When his daughters cease speaking and refuse to explain their increasingly strange behaviour, Samuel turns more and more to the refuge of his electronics shop. As his ambitions intensify, the life he has struggled so hard to improve begins to disintegrate around him, and a dark current of menace in the town is turned upon the
