Let Your Creativity Flow with The Freedom of a Blank Lined Notebook A fantastic personalized present or a great treat for yourself, this 6 x 9 inches paperback journal comes with 120 lined pages that are created for everyday use. This cute personalized name notebook is perfect for passing notes, scrapbooking, sketching, drawing and organizing all of your user names and passwords. With lots of lined white pages, there's plenty of room to jot down your visions. This notebook is motivational themed to help you make huge leaps towards your dreams by writing and reflecting on your daily activities and going over them again to track your monthly progress. This journal to write in is an amazing piece for note taking, journaling, to-do-list or planning. You can also use it as a pocket diary to keep daily records of events and pen your thoughts, ideas and memories. This multiple-paged journal is compact enough to carry in your bag or backpack for easy movement. Grab one for yourself and a few for your friends!

The integration of digital technologies into practice presents opportunities and challenges for the field of youth work. Digitalization procedures transform interactions with users, in addition to their needs. These also transform the organizations where youth workers are involved in professional practice. Adapting digital technological tools is a crucial challenge for the youth work profession. Youth Work in a Digital Society is an essential scholarly publication that explores how to overcome any challenges and issues facing youth development work in the digital age and to what extent modern digital technologies can contribute to empowering youth work practice. Featuring a wide range of topics such as digital inclusion, mobile technologies, and social media, this book is ideal for executives, managers, researchers, professionals, academicians, policymakers, practitioners, and students.

The purpose of this book is to compile and publicize the best current thinking about training and professional development for youth workers. School age youth spend far more of their time outside of school than inside of school. The United States boasts a rich and vibrant ecosystem of Out?of?School Time programs and funders, ranging from grassroots neighborhood centers to national Boys and Girls Clubs. The research community, too, has produced some scientific consensus about defining features of high quality youth development settings and the importance of after-school and informal programs for youth. But we know far less about the people who provide support, guidance, and mentoring to youth in these settings: What do youth workers do? What kinds of training, certification, and job security do they have? Unlike K12 classroom teaching, a profession with longstanding – if contested – legitimacy and recognition, " youth work " does not call forth familiar imagery or cultural narratives. Ask someone what a youth worker does and they are just as likely to think you are talking about a young person working at her first job as they are to think you mean a young adult who works with youth. This absence of shared archetypes or mental models is matched by a shortage of policies or professional associations that clearly define youth work and assume responsibility for training and preparation. This is a problem because the functions performed by youth workers outside of school are critical for positive youth development, especially in our current context governed by widening income inequality. The US has seen a decline in social mobility and an increase in income inequality and racial segregation. This places a greater premium on the role of OST programs in supporting access and equity to learning opportunities for children, particularly for those growing up in neighborhoods of concentrated poverty. Fortunately, in the past decade there has been an emergence of research and policy arguments about the importance of naming, defining, and attending to the profession of youth work. A report released in 2013 by the DC Children and Youth Investment Corporation suggests employment opportunities for youth workers are growing faster than the national average, and as the workforce increases, so will efforts to professionalize it through specialized training and credentials. Our purpose in this volume is to build on that momentum by bringing together the best scholarship and policy ideas – coming from in and outside of higher education – about conceptions of youth work and optimal types of preparation and professional development.

Youth work is a means of promoting learning, equality and inclusion with young people. It is an incredibly rewarding profession; however, diffuse state regulation means that youth work students and practitioners must continuously wrestle with the challenges of contemporary practice in environments that are complex and changing. This book brings together a collection of voices to speak to these concerns. Drawing on the history of the profession, each chapter focuses on a different aspect of policy and practice. Chapters explore the impact of New Labour; the changes that came with the coalition government; youth work in the voluntary sector; and youth work in a digital world. Graham Bright concludes with a powerful reflection on what the future holds for the profession. Each chapter features 'Over to You' activity boxes which invite readers to engage collaboratively in developing and applying ideas, with case studies which link discussion to real life examples. This is an important book for students, practitioners and lecturers in the field of youth and community work and related practice with children and young people.

The Journal of Youth and Theology is the peer-reviewed academic journal of the IASYM. Published twice yearly, the journal features interdisciplinary research in youth ministry.

Youth Work in the Commonwealth: A Growth Profession establishes a baseline to inform the planning and implementation of initiatives to professionalise youth work in Commonwealth member countries. The study was conducted in 35 countries in the Africa, Asia, the Caribbean/Americas, Europe and Pacific regions. It catalogues the extent to which the youth work profession is formally recognised in these countries and examines the qualities and rights-based ethos of the various forms of youth work promoted and practised in the Commonwealth. The report aims to help countries learn from good practices, and assess gaps in establishing youth work as a recognised profession in diverse contexts.

Youth workers and other helping professionals regularly find themselves in situations where, despite their experience and education, they simply do not know what to do or how to respond to the circumstances facing them. This book takes up the moment of not-knowing as experienced by youth workers, providing accessible phenomenological descriptions of the experience as lived by several youth workers. In addition to exploring the five dominant themes of the experience, the book situates not-knowing in the larger context of the helping professions and the professionalization of youth work in the United States. It concludes with a discussion of the implications of not-knowing for individual youth workers, for improved practice through integrated clinical and professional supervision, and for the field as a whole. This book will be helpful to practitioners and supervisors in youth work and other helping professions. Youth workers will be able to find themselves reflected in and readily engage with the narratives. Direct service workers and supervisors will benefit from the focuses on practical implications of not-knowing and opportunities for action to help resolve its negative outcomes. Finally, interpretive researchers and students will benefit from the step-by-step description of how to conduct phenomenological investigations. This book was published as a special issue of Child & Youth Services.

Features 50 two-page journaling devotionals sends students straight into the words of Jesus to discover the truth--then it dares them to live that truth today.

Approximately 2.4 million Black youth participate in after-school programs, which offer a range of support, including academic tutoring, college preparation, political identity development, cultural and emotional support, and even a space to develop strategies and tools for organizing and activism. In Reclaiming Community, Bianca Baldrige tells the story of one such community-based program, Educational Excellence (EE), shining a light on both the invaluable role youth workers play in these spaces, and the precarious context in which such programs now exist. Drawing on rich ethnographic data, Baldrige persuasively argues that the story of EE is representative of a much larger and understudied phenomenon. With the spread of neoliberal ideology and its reliance on racism—marked by individualism, market competition, and privatization—these bastions of community support are losing the autonomy that has allowed them to embolden the minds of the youth they serve. Baldrige captures the stories of loss and resistance within this context of immense external political pressure, arguing powerfully for the damage caused when the same structural violence that Black youth experience in school, starts to occur in the places they go to escape it.

Understanding the law is now a more important part of youth work practice than ever before, and all successful youth work professionals need to understand the way that law and policy supports good ethical practice. This book provides a coherent overview of the legal processes and requirements encountered by today ' s youth work professionals, helping readers learn how to make informed ethical judgements and offer appropriate advice to young people. It offers an insight into how laws are made, explains major legal requirements for safe youth work practice and details a range of guidance on the current frameworks and legislation students and practitioners need to be aware of. Using real world scenarios, case studies, and reflective questions, it helps the reader to engage critically with the current legal context of youth work, and develop their thinking, skills and practice. This is essential reading for all students working towards professional recognition in work with young people.
