Gorillas using iPads, lemurs finger painting, squirrel monkeys popping bubbles . . . these primates are pretty smart! Could you make the grade in Primate School? Learn how diverse the primate family is, and some of the ways humans are teaching new skills to their primate cousins. Author Jennifer Keats Curtis is once again working with organizations across the country to share fun facts about primates through this photo journal.

At a time when injustice, immorality and sin ran rampant, the religion of Islam dawned to revive the bond between humanity and its Creator, and to establish peace in the world. It was at the hand of the Prophet of Islam that an unparalleled moral and spiritual transformation took place. But the Holy Prophet Muhammad, peace and blessings of Allah be upon him, prophesied that a time would come when the true teachings of Islam would be forgotten and at this time a divinely appointed reformer would appear to rejuvenate Islam. In fulfilment of this prophecy, Hazrat Mirza Ghulam Ahmad, peace be upon him, appeared in Qadian, India, and claimed to be the divinely appointed reformer awaited by all the world religions. This book comprises an address delivered by the Promised Messiah, in which he speaks about the purpose of his advent and what it means to be an Ahmadi.

Easy to use hot work permits log to monitor and keep records of all your hot work permits. Product information: Introductory page on the first page to personalize log. Index Pages to keep track of Log. Date Permit No Contractor Address Phone No Email Location Work Description Permit Issue Date Permit Expiry Date Equipment(s) To Be Used Work Start Date Work Finish Date Notes. Extra notes pages for quick access write-in and other information. 8.5" x 11" (20.32cm x 25.4cm). Thick white acid free paper of 110 pages to reduce ink bleed-through. Glossy paperback cover. First Published in 2004. Routledge is an imprint of Taylor & Francis, an informa company.

"Twelve-year-old Charlie and his friends must find out why their neighboring town has become overrun with sleepwalkers before what's going around reaches them and it's too late."--

For all courses in soils and foundations, geotechnical engineering, soil mechanics, and foundation engineering. Ideal for beginners, Soils and Foundations presents all essential aspects of soils and foundations in as simple and direct a manner as possible. Filled with worked examples, step-by-step solutions, and hands-on practice problems, it emphasises design and practical applications supported by basic theory. Throughout, the authors promote learning through the extensive use of diagrams, charts, and illustrations. Coverage includes: engineering properties of soils: soil exploration, compaction, stabilisation, and consolidation; water in soil; subsurface stresses; settlement of structures; shear strength; shallow and deep foundations; lateral earth pressure; retaining structures, and stability analysis of slopes. This edition's new coverage includes Pressuremeter and Dilatometer tests, water flow characterisation with Bernoulli's Theorem, dewatering, uplift pressure on dams, and subsurface stresses caused by overlying soil masses.
